MEMO TO: Interested Persons

FROM: David Templeton, Division Director, Financial and Technical Assistance

SUBJECT: 2008 State Water Planning Process Document

The Board of Water and Natural Resources continues to support water and wastewater infrastructure projects through its various programs. The 2008 State Water Planning Process Document contains the information needed by local project sponsors, planning districts, and water development districts to meet the various program applications and funding requirements. These requirements include placement of projects on the State Water Plan and completion of applications requesting funding through the Department of Environment and Natural Resources. Information on program deadlines, loan interest rates and terms, the board's meeting schedule and agenda, along with application forms may be found on the department's website – <http://www.state.sd.us/denr>.

In addition to providing information and forms for all the department's funding programs, the website provides up-to-date access to department activities, permit applications, agendas for upcoming board meetings, scheduled training opportunities, publications, maps, and lists with department personnel email, addresses and phone numbers. With a click of your mouse, you can learn more about different department programs and current activities within these programs, other state and federal agencies, or go to a host of other sites designed to keep the public informed about environmental activities.

We enjoy working with you and look forward to doing so in the future.

PLANNING PROCESS

Timetable

Small Community Planning Grant Program

Funding applications accepted by DENR	Anytime
---------------------------------------	---------

State Water Plan

State Water Plan applications due at DENR	1 st of October
---	----------------------------

Board recommendations to Governor and Legislature SWRMS designations and state funding levels	November
--	----------

Board approval of <u>Annual Report</u> and the <u>State Water Plan</u>	November
--	----------

<u>State Water Plan</u> submitted to Legislature	January
--	---------

State Water Facilities Plan amendments due at DENR	1st of February, May, and August
--	-------------------------------------

Sponsors will be notified prior to State Water Plan Applications being considered by the Board of Water and Natural Resources for placement on the plan.

Consolidated Water Facilities Construction Program

Funding applications due at DENR	1st of January, April, July, and October
----------------------------------	--

Clean Water State Revolving Fund Program

Funding applications due at DENR	15th of January, April, July, and October
----------------------------------	---

Drinking Water State Revolving Fund Program

Funding applications due at DENR	15th of January, April, July, and October
----------------------------------	---

State Water Resources Management System

Funding Need applications due at DENR	1st of October
---------------------------------------	----------------

Sponsors will be notified prior to funding applications being presented to the Board of Water and Natural Resources for consideration.

Recommended Project Timeline

1 st of October	Submit State Water Plan Application. <i>(See Section 1.0 for details.)</i>
November	State Water Plan presented to the Board of Water and Natural Resources. Project placed on Facilities Plan.
1 st of January	Submit Consolidated Application. <i>(See Section 3.0 for details.)</i>
March	Consolidated Program funding decision.
15 th of April	Submit State Revolving Fund Application. <i>(See Section 5.0 or 6.0 for details.)</i>
June	State Revolving Fund Program funding decision.
July	Proceed to design and construction.

Small Community Planning Grants

Project sponsors with populations less than 2,500 are eligible to request a Small Community Planning Grant to help complete the required preliminary engineering report so a project may be placed on the Facilities Plan. A Small Community Planning Grant may be requested at any time and provides up to 80 percent of the cost of preparing the required engineering report. A Small Community Planning Grant request should be submitted up to one year prior to submitting a State Water Plan Application. *(See Section 2.0 for details.)*

Alternative Project Timelines

The schedule above can be adjusted for projects that are amended onto the Facilities Plan throughout the year by moving the State Water Plan application date to the first of February, May, or August; the Consolidated Grant application date to the first of April, July, or October, respectively; and the SRF application date back to the 15th of July, October, or January, respectively.

1.0 STATE WATER PLANNING PROCESS

The South Dakota Legislature established the State Water Plan in 1972. The State Water Plan implements state policy on water resources management, serves as the principal guide for state policies and priorities, and identifies areas needing assistance.

Under South Dakota Codified Law 46A-1-7, the Board of Water and Natural Resources (the board) is charged with the responsibility to establish statewide policies for water resources management. The board recognizes that water resources management encompasses many areas including irrigation, water conservation, domestic water, rural water, lake restoration, recreation, flood control, watershed management, ground water protection, water quality, and water supply. All of these areas are interrelated with many other economic and social factors.

The Department of Environment and Natural Resources, Division of Financial and Technical Assistance serves as staff for the board as it carries out its State Water Plan duties. In this role, staff administers the State Water Plan; develops funding recommendations for the construction of water, wastewater, and watershed restoration projects; manages the Water and Environment Fund; evaluates and implements nonpoint source pollution control projects; manages major water resource feasibility projects; and provides technical assistance.

1.1 State Water Plan

The State Water Plan consists of two components - the State Water Resources Management System and the State Water Facilities Plan.

1.1.1 State Water Resources Management System

The State Water Resources Management System identifies large, costly water projects seeking significant state and federal cost-share assistance and that may require state and federal authorization. These projects normally require several years to plan and complete.

Projects are placed onto the State Water Resources Management System by the Legislature and the Governor. The board develops recommendations annually for the Legislature and the Governor on which projects should be retained, deleted, or added to the State Water Resources Management System.

Projects that have been placed on the State Water Resources Management System remain on the plan until removed by the Legislature. No project on the State Water Resources Management System may also be included on the State Water Facilities Plan.

1.1.2 State Water Facilities Plan

The State Water Facilities Plan is a listing of potential water projects. The board is responsible for placement of projects onto the plan. Projects placed on the plan in October are retained on the plan for two calendar years. Projects amended onto the plan throughout the year are retained for the balance of that year and for the entire calendar year that follows. **Placement on the State Water Facilities Plan provides no guarantee of funding.**

The State Water Facilities Plan includes projects such as rural, municipal, and industrial drinking water; wastewater; storm sewer; and watershed restoration.

1.2 Funding Programs

The Board of Water and Natural Resources manages several funding programs administered by the Division of Financial and Technical Assistance. These programs include:

1. Small Community Planning Grant Program
 - a. Provides grants to communities (less than 2,500 population) to hire professional consultants to complete water or wastewater engineering studies or rate analyses; and
 - b. Projects seeking Small Community Planning Grant funding may not be on the State Water Plan and may not be amended onto the Facilities Plan until the engineering study or rate analysis has been completed and approved.
2. State Water Resources Management System
 - a. Provides grants or loans to local sponsors for projects on the State Water Resources Management System list;
 - b. The board recommends funding to the Governor and the Legislature for State Water Resources Management System projects; and
 - c. Project funding is provided by legislative special appropriation.
3. Consolidated Water Facilities Construction Program
 - a. Provides grants or loans for water, wastewater, and watershed restoration projects; and
 - b. Projects requesting Consolidated Program funding must be on the State Water Facilities Plan prior to submitting an application.
4. Clean Water State Revolving Fund Program
 - a. Provides low interest loans for wastewater, storm water, or nonpoint source projects; and

- b. Projects requesting a Clean Water State Revolving Fund loan must be on the State Water Facilities Plan prior to the funding being approved.
- 5. Drinking Water State Revolving Fund Program
 - a. Provides low interest loans for drinking water projects; and
 - b. Projects requesting a Drinking Water State Revolving Fund loan must be on the State Water Facilities Plan prior to the funding being approved.

The board also recommends funding for watershed projects from the federal nonpoint source programs. Final funding decisions are made by EPA.

1.3 Intended Use Plans

Projects seeking loans through either the Clean Water State Revolving Fund or the Drinking Water State Revolving Fund programs must also be included on the corresponding Intended Use Plan. The Intended Use Plans are prepared annually by the department and are based in large part on the State Water Plan applications received. The Intended Use Plans describe how the department plans to use program funds during the year and includes a list of potential projects. The board conducts a public hearing in November to approve each Intended Use Plan. The board may amend projects onto the list at any meeting.

1.4 DENR Technical Assistance

For technical assistance regarding the State Water Planning Process contact:

PMB 2020
Department of Environment and Natural Resources
Division of Financial and Technical Assistance
523 East Capitol Avenue
Pierre, SD 57501-3182

PLANNING DISTRICTS

2.0 SMALL COMMUNITY PLANNING GRANT

The Small Community Planning Grant Program was established to promote a proactive approach to water and wastewater infrastructure management. This program provides small communities with funds to hire an engineering consultant to conduct a comprehensive study and develop an engineering report with recommended alternatives. The engineering report's level of detail will be on par with the facilities plan required for SRF projects.

The Small Community Planning Grant Program also includes utility rate analysis and review. Communities can access grant funds to procure professional services to conduct a rate analysis and review using Show-me Ratemaker™.

2.1 Eligibility Requirements

The grant is available to systems serving a population of 2,500 or fewer. The project sponsor must be an entity of government (county, municipality, or township) or a special purpose district with the authority to construct a water or wastewater project (sanitary, water user, watershed, or water project). Non-profit organizations are also eligible provided they were formed for the primary purpose of supplying water or sanitary service. Nonprofit water systems applying for this grant must meet the definition of a community water system (a public water system which serves at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents). This grant is not available for projects already on the State Water Plan. Grants will be made on a first come, first served basis.

2.2 Application Requirements

An applicant must submit an original application to the Department of Environment and Natural Resources. The application will be reviewed by staff for completeness and technical merit. Staff will work with applicants to correct any identified deficiencies.

2.3 Engineer Certification of Services

The goal of the Small Community Planning Grant is to perform a comprehensive study of the water or wastewater system being evaluated and develop a detailed report of the findings. The report should provide the level of detail expected for a State Revolving Fund (SRF) facilities plan or a USDA Rural Development Preliminary Engineering Report (PER).

The certification form provided with the application materials must be signed by the engineer conducting the study and submitted with the engineering scope of services and other application forms to the department. The scope of services must provide a firm date by which the engineer will complete and submit the engineering report.

2.4 Award Dates

The Department of Environment and Natural Resources may make a small community planning grant award at any time following department review of the application.

2.5 Award Criteria

Communities will be reimbursed 80 percent of the cost of the engineering study upon completion of the engineering report. The maximum reimbursement a community may receive is \$6,000 for a water or wastewater engineering study.

Wastewater related studies may receive reimbursement up to \$8,000 if activities related to infiltration and inflow (I/I) analysis are conducted. Eligible I/I activities include smoke testing, dye testing, televising lines, and flow measurement within the collection system. The eligibility of other activities proposed for infiltration and inflow analysis will be evaluated on a case-by-case basis. To be eligible for the additional funds, a community must justify the need to conduct an I/I study.

Communities conducting a utility rate analysis and review study may receive reimbursement of 80 percent of costs up to \$1,600. The study must be an analysis using the Show-me Ratemaker™ process.

The remaining cost will be paid by the community and may consist of local cash or other non-state grant assistance. In-kind contributions will not be accepted as local match.

The engineering or utility rate report will be considered complete and payment made to the grantee only if all the items discussed in the *Report Requirements* section are addressed. The department will determine completeness of the study.

2.6 Report Requirements

The engineering study should contain adequate information to be used as a facilities plan. An outline of items that must be included in the engineering study is located on the Engineer Certification of Services form. The facilities plan requirements are shown in sections 5.11.1 of the Clean Water State Revolving Fund and 6.12.1 of the Drinking Water State Revolving Fund applications. A professional engineer licensed in the state of South Dakota must prepare the study.

The Show-me Ratemaker™ analysis must be conducted by a recognized technical assistance provider or financial planning professional competent in providing this service. The report must include the background assumptions and the information generated by the Show-me Ratemaker™ software. Show-me Ratemaker™ is software provided by the Missouri Department of Natural Resources and can be accessed at www.dnr.state.mo.us/oac/emiapps.htm.

2.7 Application to State Water Plan

An applicant cannot apply to place a project resulting from a small community planning grant study on the State Water Plan until the report is approved by the department. It is recommended that the engineer's progress be monitored to ensure the report is completed and approved in a timely manner.

2.8 SMALL COMMUNITY PLANNING GRANT APPLICATION FORM

Small Community Planning Grant Application Form

Applicant:		Service Area Population:
Federal Employer ID No.	Sub Applicant:	

Description: Include a brief narrative statement that describes the need or problem to be studied.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

2.8.1 Engineer Certification of Services

It is expected that studies funded through the Small Community Planning Grant will meet minimum requirements. A comprehensive study of the water or wastewater system must be conducted and a detailed report of the findings prepared. The report should provide the level of detail expected for a State Revolving Fund (SRF) facilities plan or a USDA Rural Development Preliminary Engineering Report (PER).

The following is a summary of items that must be addressed based on project type. Please review the applicable sections and sign the form. The signed form should be included with the scope of services provided to the project sponsor. A date of completion for the final report must also be provided on the form.

Minimum Information Expected in Final Reports

System-wide Wastewater Collection or Water Distribution Studies:

- A narrative description of the system to include age, present condition, known water loss, infiltration/inflow (I/I), etc.;
- A map of the system showing pipe, according to type and size, and appurtenances;
- A map or maps showing wetlands, historic properties, and other pertinent features that may be affected by any improvements;
- A narrative discussion of alternatives to include no-action, trenchless technology, and open trench construction; and
- Unit cost breakdowns and present worth evaluations of each feasible alternative.

Wastewater Collection or Water Distribution Extension Studies:

- Narrative explaining the need for the new utility;
- A map or maps showing the project location, wetlands, historic properties, and other pertinent features;
- Discussion of the ability of the existing infrastructure to accommodate the new flows/demand;
- Discussion of the direct and indirect impacts that will result from the project;
- A narrative discussion of the no-action alternative and any other viable alternatives considered; and
- Unit cost breakdowns and present worth evaluations of each feasible alternative.

Infiltration/Inflow (I/I) Studies

- A detailed explanation of the methods used to determine the locations and extent of I/I including smoke testing, televising and flow measurement;

- A summary of the findings to include specific areas discovered to have I/I and the extent of I/I in each area; and
- Recommendations for improvements, if necessary, and unit cost breakdowns and present worth evaluations of each.

Wastewater Treatment Studies

- Narrative describing the condition of the existing facility and explaining the need for the new treatment facility;
- Evidence of consultation from the DENR Surface Water Quality program regarding potential stream reclassifications, change in permit conditions, etc.;
- A map or maps showing the project location, wetlands, historic properties, public and private water sources, airports, and other pertinent features;
- All data, records, and technical information used for the basis of the design;
- A narrative discussion of several possible alternatives, to include no-action and collection rehabilitation where excessive I/I is identified, and reasons for excluding certain types of treatment technologies;
- Unit cost breakdowns and present worth evaluations of each feasible alternative; and
- Design calculations for each feasible alternative (this may be omitted for extensive mechanical treatment options).

Water Treatment Studies

- Narrative describing the condition of the existing facility and explaining the need for the new treatment facility;
- A map or maps showing the project location, wetlands, historic properties, and other pertinent features;
- All data, records, and technical information used for the basis of the design;
- A narrative discussion of several possible alternatives, to include no-action and regionalization or consolidation of systems, and reasons for excluding certain types of treatment technologies;
- Formal proposals or correspondence from regional water system(s) stating ability and willingness to provide service and details and costs associated with the regional water system's proposals; and
- Unit cost breakdowns and present worth evaluations of each feasible alternative.

Water Supply or Storage Studies

- Narrative describing the condition of the existing facility and explaining the need for the new facilities;
- A map or maps showing the project location, wetlands, historic properties, and other pertinent features;
- Historical water use records for average and peak conditions;
- Average and peak water use projections;

- A narrative discussion of several possible alternatives, to include no-action and regionalization or consolidation of systems;
- Formal proposals or correspondence from regional water system(s) stating ability and willingness to provide service and details and costs associated with the regional water system's proposals; and
- Unit cost breakdowns and present worth evaluations of each feasible alternative.

I hereby certify that I have read and understand the requirements identified in this form and have provided a date of completion. I am aware that no funds will be disbursed until the engineering report is approved by the Department of Environment and Natural Resources.

The Report will be completed by _____.

Signature of Engineering Consultant

Date

2.9 Application Instructions

Applicant. Give the name and mailing address of the sponsoring entity requesting funds.

Service Area Population. Provide the population of the proposed area to be served by the water distribution or wastewater collection system.

Federal Employer Identification No. Give the federal employer identification number of the sponsoring entity requesting program funds.

Sub Applicant. If applicable, identify the organization on whose behalf the application is submitted.

Description. Give a brief narrative describing the need or problem to be addressed in the engineering report. Include adequate information to justify the need for an I/I study if a detailed I/I investigation will be conducted and additional funding up to \$8,000 will be requested.

Applicant Certification. This section is to be read and dated by an official of the sponsoring entity who has been authorized by resolution of the governing body to submit the application.

Application Prepared By. Identify the individual and entity that helped prepare the application. Provide the contact information in case questions arise about the application. Also identify the engineer or consultant that will be responsible for submittal of the required report.

Engineer Certification of Services. The engineer selected by the sponsor to complete the small community planning grant report must read, agree to and sign the certification document, and provide the required report completion date.

3.0 STATE WATER PLAN

The South Dakota Legislature established the State Water Plan in 1972. The State Water Plan is intended to implement state policy on water resources management, to serve as the principal guide for state policies and priorities, and to identify areas for project assistance.

The State Water Plan consists of two components – the State Water Resources Management System and the State Water Facilities Plan.

3.1 State Water Resource Management System

The State Water Resources Management System identifies large, costly water projects that require significant state and federal cost share. These projects normally require several years to plan and complete.

Projects are placed onto the State Water Resources Management System by the Legislature and Governor. The Board of Water and Natural Resources develops annual recommendations for the Legislature and Governor on which projects should be retained, deleted, or added to the State Water Resources Management System. **Placement on the State Water Resources Management System provides no guarantee of funding.**

Projects that have been placed on the State Water Resources Management System remain on the list until removed by the Legislature. No project on the State Water Resources Management System may also be included on the State Water Facilities Plan.

3.2 State Water Facilities Plan

The State Water Facilities Plan is a list of potential water projects. Types of projects on the facilities plan include: rural, municipal, and industrial water supply, treatment, storage and distribution; wastewater collection, transport, and treatment; storm water collection and treatment; and watershed restoration.

The Board of Water and Natural Resources is responsible for placement of projects onto the State Water Facilities Plan. Local sponsors may request a meeting with department staff to discuss the project, alternatives, rates, and funding criteria. **Placement on the State Water Facilities Plan provides no guarantee of funding.**

A preliminary engineering study must be submitted as part of the State Water Facilities Plan application for infrastructure projects. These projects should be ready to initiate construction within two years.

A watershed assessment study or project implementation plan must be submitted as part of the application for watershed restoration projects. Watershed restoration projects are generally of longer duration than

community infrastructure projects. State Water Facilities Plan applications should indicate the restoration practices to be implemented in the next three years. If funds will be requested after this period, a new State Water Plan application is required.

3.3 Application Deadline

State Water Plan applications must be postmarked or received at the Department of Environment and Natural Resources on or before the first day of October. If a project is located within the boundaries of a water development district (see section 1.4.2 for water development district map), the department recommends a copy of the application be submitted to the appropriate water development district. Projects placed on the State Water Resources Management System remain on the list until removed by the Legislature. Projects placed on the State Water Facilities Plan remain on the plan for two calendar years.

Realizing that projects develop during the year, the board will consider applications for amendment onto the State Water Facilities Plan periodically. Applications for amendment onto the facilities plan must be postmarked or received at the department on or before the first day of February, May, and August. If located within the boundaries of a water development district, the department recommends a copy of the application for amendment be submitted to the appropriate district.

In the event of an emergency when a project sponsor cannot wait for the identified application deadline, an emergency facilities plan amendment application may be submitted for board consideration if it meets one of the following conditions:

- 1) The proposed project is necessary due to an act of God; strike, lockout, or other labor disturbance; act of a public enemy; order or restraint of any kind of the government of the United States of America, the State of South Dakota or any of its departments, agencies, or officials, or any civil or military authority other than the applicant or a municipal utility board; storm; drought; flood; explosion; breakage or accident to machinery, tanks, transmission or collection pipelines, or canals; or any other cause or event not reasonably within the control of the applicant; or
- 2) The proposed project is necessary to take advantage of potential project financing and the opportunity may be lost unless action is taken.

Projects placed on the State Water Facilities Plan through the amendment process remain on the plan for the balance of the current calendar year and the following year.

3.4 Placement Criteria

The following criteria are used as guidelines to determine project merit for placement onto the State Water Plan:

- 1) South Dakota Codified Law (SDCL) 46A-1-93 provides that the highest priority shall be given to domestic uses of water through the development of public water distribution systems.
- 2) Environmental projects which correct serious health or pollution concerns.
- 3) Consolidation of facilities or regionalization of systems which are economically viable.
- 4) Expansion of existing systems which provide an increase in services and promote the objectives contained in criteria 1, 2, and 3 above.
- 5) Local support for the project including the proposed level of local financing to include cash, loans, or use of in-kind services in the project.
- 6) Long-term planning which enables a local project to provide for future maintenance, replacement, or expansion of the project.
- 7) Sponsors receiving a Small Community Planning Grant are not eligible to apply for placement on the State Water Plan until the required engineering study or rate analysis is completed and approved by the department.

Rehabilitation of existing systems should only be considered as meeting the criteria if the project addresses the following criteria:

- 1) Commitment of local funds for the maintenance and repair of the system for its expected life including amortization costs.
- 2) Annual maintenance and repair schedule to ensure maintenance and repair of the system.

3.5 Drinking Water Project Self-Assessment

Sponsors of drinking water projects must complete the “Drinking Water Project Eligibility and Priority List Self-Assessment” questionnaire in the State Water Plan application. The questionnaire is used to determine eligibility and priority points for the Drinking Water SRF program. **All drinking water projects must complete the assessment regardless of the funding proposed in the State Water Plan Application.**

The engineering report must support the responses on the self-assessment. Supporting documentation must be included if a “yes” response is given for questions regarding violations of drinking water standards (items 1, 4, and 5 in the priority point section).

3.6 Approval Dates

The department will notify applicants of the date and time for the meeting at which applications will be considered by the board. Board meeting dates and agendas are available on the DENR website.

3.7 DENR Technical Assistance

For technical assistance regarding the State Water Plan Application contact:

PMB 2020
Department of Environment and Natural Resources
Division of Financial and Technical Assistance
523 East Capitol Avenue
Pierre, SD 57501-3182
(605) 773-4216
(605) 773-4068 fax

or:

email: DENRINTERNET@state.sd.us

website: <http://www.state.sd.us/denr>

3.8 STATE WATER PLAN APPLICATION FORM

State Water Plan Application Form

Applicant	Proposed Funding Package Consolidated Grant \$ _____ Consolidated Loan \$ _____ Clean Water SRF Loan \$ _____ Drinking Water SRF Loan \$ _____ Nonpoint Source 319 Grant \$ _____ Other \$ _____ \$ _____ \$ _____ \$ _____ TOTAL \$ _____
Federal Employer ID No.	

Project Title: _____

Description: (Include present monthly utility rate and whether a reserve fund has been established for the utility to benefit from the project.)

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Name and Title of Authorized Signatory (Typed) Phone #	Signature Date

3.8.1

State Water Plan Drinking Water Project Eligibility and Priority Point Self-Assessment

The engineering report must support all responses on this assessment.

Eligibility Assessment

Yes

No

1. Is the project intended mainly for fire protection? _____
2. Is the project primarily intended to serve future growth?
*Note: providing service to existing homes or businesses
not currently served is not considered future growth.* _____

If the answer to either question is "yes" the project may not be eligible for an SRF loan. Contact the department for more information.

Priority Point Assessment

1. If the water system has experienced either situation described below in the past three years, will this project correct the deficiency? If so, indicate which situation applies.
 - A. occurrences of nitrates, fecal coliform, or E. coli bacteria that have exceeded the allowable limits as defined in ARSD 74:04:12; _____
 - B. occurrences of chronic primary drinking water contaminants that have exceeded the allowable limits as defined in ARSD 74:04:12 or the system is in violation of a treatment technique. _____
2. Please provide the monthly user rate expected as a result of this project (based on 5,000 gallons for municipalities and sanitary districts and 7,000 gallons for other systems). _____
(Monthly Rate)
3. If the project will regionalize facilities, indicate which of the following best describes the project:
 - A. consolidation of a municipality or sanitary district treatment, supply, and distribution system with another community water system, and the consolidation is cost effective; _____
 - B. consolidation of a municipality or sanitary district treatment system with another community water system, and the consolidation is cost effective; _____
 - C. expansion of the service area of a community water system that is not operated by a municipality or sanitary district to provide water to 25 or more new residences; or _____
 - D. expansion of the service area of a community water system that is not operated by a municipality or sanitary district to provide water to less than 25 new residences. _____

Applicant: _____

Project Title: _____

		Yes	No
4.	If the water system has experienced occurrences of secondary drinking water contaminants that have exceeded the guidelines in the past three years, will this project address the suspected cause of these occurrences? Indicate all contaminants that have been exceeded. The specific contaminants and the maximum contaminant level are:		
	chloride250 mg/L	_____	_____
	color 15 color units	_____	_____
	fluoride2.0 mg/L	_____	_____
	foaming agents0.5 mg/L	_____	_____
	iron0.3 mg/L	_____	_____
	manganese0.05 mg/L	_____	_____
	odor 3 threshold odor number	_____	_____
	pH.....range: 6.5 to 8.5	_____	_____
	silver0.1 mg/L	_____	_____
	sulfate250 mg/L	_____	_____
	total dissolved solids500 mg/L	_____	_____
	zinc5 mg/L	_____	_____
5.	In the past three years has the water system experienced occurrences of total coliform that have exceeded the allowable limits, and will this project address the suspected cause of these occurrences?	_____	_____
6.	The project is a rehabilitation of contaminated drinking water sources or development of new sources to replace contaminated sources.	_____	_____
7.	The project is needed to develop sources due to inadequate supply.	_____	_____
8.	The location of the applicant's primary source of water is within the boundaries of an established wellhead or source water protection area.	_____	_____
9.	The project will replace transmission lines for the following reasons (indicate all that apply):		
	A. removal of lead piping	_____	_____
	B. decrease water loss volume by 10% or more	_____	_____
	C. looping of lines to improve water quality	_____	_____
	D. lines are 50 years old or older	_____	_____
10.	The project will construct storage for a system with capacity less than a peak day's demand or is needed to address low pressure problems. Low pressure is defined as less than 20 pounds per square inch.	_____	_____
11.	The project will construct, upgrade, or replace a water treatment plant or its components to assure compliance with upcoming or existing regulations.	_____	_____
12.	Population - For a project sponsored by a community or sanitary district, provide the population of the community as reported in the 2000 census. For regional systems, please provide the population of the area, based on the 2000 census, to benefit from the project.	_____ (Population)	

Applicant: _____ Project Title: _____

3.9 Application Instructions

Applicant. Name and mailing address of the entity sponsoring the project.

Federal Employer Identification No. Provide the federal employer identification number of the entity sponsoring the project.

Project Title/Description. Provide a one line title and a paragraph describing the project. Be specific, providing the feet or miles of pipe to be constructed, replaced or repaired; treatment process being utilized; gallon capacity of storage tanks; cubic yards of sediment to be removed; linear feet of shoreline to be stabilized; and so forth. **Include the current monthly utility rate.** If the rate is not a flat rate, compute the monthly water and wastewater rate at 5,000 gallons for municipalities and sanitary districts and at 7,000 gallons for all other systems. Additionally, indicate whether a reserve fund has been established for the utility benefiting from the project.

Proposed Funding Package. Include the amount and type of anticipated funding, the amount of local funds being provided as match, including public or private direct contributions, loans, federal funds, and water development district grants.

Enter the total amount on the last line. Enter project funding as anticipated for the total project even if the project and funding will be phased.

Applicant Certification. This section is to be read and dated by an official of the sponsoring entity who has been authorized by resolution of the governing body to submit the application.

Application Prepared By. Identify the individual and entity that helped prepare the application. Provide the contact information in case questions arise about the application. Also identify the engineer or consultant responsible for any preliminary design, watershed assessment, project implementation plan, and cost estimates.

Drinking Water Self Assessment: **Only Drinking Water Systems must complete the self-assessment form.** Complete the self-assessment and provide the applicant's name and the project title at the bottom of each page. Attach supporting documentation for any "yes" responses to questions regarding violations of drinking water standards (items 1, 4, and 5 in the priority point assessment section).

3.10 Preliminary Engineering Design, Project Implementation Plan, and Cost Estimates

Attach a preliminary engineering report, watershed assessment, or project implementation plan which outlines the project and its cost estimate. Outlines of the information required in the preliminary engineering report and project implementation plan are given in following sections.

The facilities plan required with an SRF loan application satisfies this requirement and avoids duplication later.

3.10.1 Preliminary Engineering Report Requirements

- I. Introduction
 - A. Background Information
 - B. Purpose/Scope of Report
- II. Need for Project
 - A. Health and Safety Issues
 - B. Condition/Adequacy of Existing System
- III. Description of Proposed System
 - A. Map
 - B. Land Requirements
- IV. Design Parameters
 - A. Identify Planning/Service Area (including planned development)
 - B. Expected Usage
 1. Include I/I for wastewater projects
 2. Include water loss for water projects
 - C. Population Trend
 - D. Design Period
- V. Cost Estimates
 - A. Itemized Break-out of Construction Costs
 - B. Other Costs
 1. Engineering
 2. Administration
 3. Land Acquisition/Easements
 4. Legal
 5. Other
 - C. Annual O&M Costs
 - D. User Rate Impacts
- VI. Other Alternatives Considered
- VII. Implementation Schedule

3.10.2 Project Implementation Plan Requirements

For complete guidance on the required Project Implementation Plan visit:

<http://www.state.sd.us/denr/DFTA/WatershedProtection/319.htm>

- I Summary Sheet
- II Statement of Need
 - A Project need - water quality problem(s) and priority.
 - B Waterbody and aquatic habitat description.
 - C Maps –watershed, sampling sites and sources of NPS pollution.
 - D Topography, land ownership/use, precipitation, geology.
 - E Define the quality problem.
- III Project Description
 - A Project Goal, objectives, tasks and products
 - B Milestone table with outputs, quantities and timing of each output,
 - C Environmental permits required to conduct the project.
 - D Why the sponsor is the appropriate entity to implement the project.
 - E Plans and responsibilities for BMPs operation and maintenance.
- IV Coordination Plan
 - A Sponsor and project partner responsibilities, roles and commitments.
 - B Local support and letters of commitment.
 - C Coordination with other 319 programs and projects.
 - D Similar activities taking place in the watershed.
- V Evaluation and Monitoring Plan
 - A EPA-approved Quality Assurance Project Plan (QAPP)
 - B Monitoring strategy
 - C How and when data will be stored, managed and reported.
 - D Models used.
 - E Funding for the operation and maintenance (O&M) of BMPs.
- VI Budget
 - A Budget identifying the sources and uses project year.
- VII Public Involvement
 - A How public involvement will be encouraged
- VIII Threatened and Endangered Species
 - A Threatened and Endangered Species in the project area

4.0 CONSOLIDATED WATER FACILITIES CONSTRUCTION PROGRAM

The Consolidated Water Facilities Construction Program was established to provide grants and loans for water projects. The Board of Water and Natural Resources (the board) has been authorized by the Legislature to administer the program. The funds available are dependent upon the amount appropriated by the Legislature and the funds previously awarded.

4.1 Eligibility Requirements

Applicants must be sponsored by one of the following: a special purpose district with the authority to construct a water resources project; a state agency or general purpose government such as a municipality, county, or township; a federally recognized Indian tribe; or a nonprofit corporation formed pursuant to South Dakota Codified Laws (SDCL) 47-22 with the authority to construct, operate and maintain a water resources project.

Project must be on the State Water Facilities Plan prior to application submittal.

4.2 Application Deadlines

Applications must be postmarked or received on or before the **first** day of January, April, July, and October. The department presents applications to the board after the required technical reviews and financial analyses have been completed.

4.3 Application Requirements

An applicant must submit a signed original application to the Department of Environment and Natural Resources. The application will be reviewed by staff for completeness and technical merit. Staff will work with applicants to correct any identified deficiencies.

In accordance with the Administrative Rules of South Dakota (ARSD) 74:05:07:08.01, the board will consider only applicants that:

- 1) Meet the applicable minimum monthly rate requirement detailed later in this section;
- 2) Have established an operation, maintenance, and replacement reserve fund;
- 3) Have identified any necessary permits and the current status of the permits;

- 4) Have identified any required lands, easements and rights-of-way and the status of obtaining them;
- 5) Have identified all proposed sources of financing and the status of obtaining the funds; and
- 6) Show a project schedule indicating the project will proceed in a timely manner.

Waivers from these criteria may be obtained from the department secretary. Waivers will be considered for economic development opportunities, expansion into new areas, regionalization of facilities, or other unique situations that may require consideration.

The minimum utility rates are established in ARSD 74:05:07:08.01(1). **The minimum monthly utility rates necessary for an application to be presented to the board are:** \$20 for 5,000 gallons of drinking water for incorporated municipalities and sanitary districts; \$50 for 7,000 gallons of drinking water for all other applicants; \$17 for 5,000 gallons of wastewater for incorporated municipalities and sanitary districts; and \$35 for 7,000 gallons of wastewater for all other applicants. **Adoption of minimum monthly utility rates provides no guarantee of funding.**

If located within the boundaries of a water development district, the department recommends a copy of the application be submitted to the district. The district board may review applications and make recommendations to the board regarding funding. (See section 1.4.2 for water development district map.) Water development district recommendations should address any requests or awards of district funds. The recommendation should provide any local conditions that should be considered in the board's funding decision.

4.4 Interest Rates and Terms

The rates and terms are established by the board and are available on the DENR website.

4.5 Award Dates

The department will notify applicants of the date and time for the meeting at which applications will be considered by the board. Board meeting dates and agendas are available on the DENR website.

4.6 Award Criteria

The board may award less than the amount requested in the application. In addition, the board may award a grant, a loan, or a combination of grant and

loan regardless of the funding requested. Each application will be reviewed based on the following criteria:

- 1) Annual utility cash flow;
- 2) Available local cash and in-kind contributions;
- 3) Available program funds;
- 4) Compliance with permits and regulations;
- 5) Debt service capability;
- 6) Economic impact;
- 7) Other funding sources;
- 8) Readiness to proceed;
- 9) Regionalization or consolidation of facilities;
- 10) Technical feasibility;
- 11) Utility rates; and
- 12) Water quality benefits.

SDCL 46A-1-93 provides the highest priority shall be given to domestic uses of water through the development of public water distribution systems.

4.7 Rules and Regulations

Rules and regulations concerning the consolidated program may be found in the ARSD 74:05:07. For copies of these rules or the Assurances, Terms, and Conditions for consolidated awards, contact:

PMB 2020
Department of Environment and Natural Resources
Division of Financial and Technical Assistance
523 East Capitol Avenue
Pierre, SD 57501-3182
(605) 773-4216
(605) 773-4068 fax

or:

Does sponsor have a separate storm water fee? Yes _____ No _____

If yes, attach the current and proposed rate ordinances or resolutions and rate schedules. Identify below the rate charged and explain how fee is calculated.

4.8.5 Program Narrative Statement

The program narrative statement should be brief and describe the need, objectives, method of accomplishment, geographical location of the project, and benefits expected from the assistance.

4.8.6 Engineering Design and Cost Estimates

Preliminary engineering, architectural design, or project implementation plan(s) and itemized cost estimates must be completed and submitted to the Department of Environment and Natural Resources with the application.

4.9 Application Instructions

4.9.1 Application Form

Applicant. Name and mailing address of the entity sponsoring the project.

Federal Employer Identification No. Federal employer identification number of the entity sponsoring the project.

Subapplicant. Organization on whose behalf the application is being submitted.

Proposed Funding Package. Include the amount and type of funds requested, the amount of funds being provided as local match, including direct public or private contributions, loans, federal funds, and water development district or conservation commission grants. Enter the total amount on the last line. Multi-year or phased projects should enter only the costs associated with activities for which assistance is being requested.

Project Title/Description. Provide a one line title for the project and a brief narrative describing the project. Be specific, providing the feet or miles of pipe; treatment process being utilized; capacity of storage tanks; cubic yards of sediment removal; feet of shoreline stabilization; and so forth. **Include the current monthly utility rate.** If the rate is not a flat rate, compute the monthly water and wastewater rate at 5,000 gallons for municipalities and sanitary districts and at 7,000 gallons for all other systems. Additionally, indicate whether a reserve fund has been established for the utility benefiting from the project.

Applicant Certification. An official of the sponsoring entity who has been authorized by resolution of the governing body to submit the application must read and sign the application.

Professional Contacts

Application Prepared By: Identify the entity, the individual that helped prepare the application, and the other contact information requested in case questions arise about the application.

Consulting Engineering Firm: Identify the engineering firm retained by the sponsor, the engineer's name, and the other contact information requested in case questions arise about the application.

Legal Counsel's Firm: Identify the law firm retained by the sponsor, the attorney's name, and the other contact information requested in case questions arise about the application.

4.9.2 Budget Sheets

Note: Multi-year projects should enter only budget costs associated with activities for which financial assistance is being requested.

Line 1.A - Amount needed for personal services related to grant management and clerical duties.

Line 1.B - Amount needed for travel including vehicle rental.

Line 1.C - All legal fees associated with this project including bond counsel fees, if applicable.

Line 1.D - Amount needed for other administrative expenses including: an independent financial audit, publishing, meetings, and any other expenses expected for project administration, including planning district contracts.

Line 2 - Amounts directly associated with the acquisition of land, existing structures, and related rights-of-way.

Line 3.A - Fees for engineering bidding and design services.

Line 3.B - Fees for engineering construction inspection.

Line 3.C - Amounts for other technical services, such as surveys, operation and maintenance manual preparation, tests, and borings not included in Line 3.A or 3.B.

Line 4 - Amounts for the actual construction of, addition to, or restoration of a facility. Also include in this category the amounts of project improvements such as roads, access restrictions, new trenches, landscaping, and run-off control measures.

Line 5 - Amount needed to purchase or rent equipment required for the project.

Line 6 - Amount of contracts (excluding legal, engineering, and construction) associated with the project including sampling and laboratory services.

Lines 7 & 8 - Identify amounts for items not specifically mentioned above.

Line 9 - Sum of Lines 1 through 8.

Line 10 - Estimated amount for contingencies. Contingencies should not exceed 10% of the amount on Line 9.

Line 11 - Sum of Lines 9 and 10.

Line 12 - Percentage that column total is of total project costs.

4.9.3 Method of Financing

Indicate the source of the secured/unsecured share of funding. If funds have been secured, indicate the amount in the "secured" column. If funds are

unsecured at time of application, indicate the amount of the unsecured funds and the date funds are anticipated to be secured in the "unsecured" column. Include any remarks regarding funding in a separate narrative. Total the secured and unsecured funding amounts at the bottom of the table.

4.9.4 Funds to be Borrowed

Provide the amount, rate, and term of the funds to be borrowed to help finance the project. Include the amount of the annual debt service and security pledged towards loan repayment. For "other," explain the source of funds along with the above mentioned items.

4.9.5 General Information

The following information will be used to evaluate the applicant's capacity to provide local funds for the project and the continuing operation, maintenance, and replacement of the system.

A. Fiscal Year - The month and date your fiscal year begins.

B. Population Served - Fill in population data. Estimate current year if necessary.

Watershed/lake restoration projects may proceed to the Program Narrative Statement detailed in section 4.9.7.

4.9.6 General Utility Information

Current Utility Debt - Enter the current debt obligations of the applicant. If the applicant is a water, wastewater, solid waste, or other "enterprise" type system, which relies on rates and charges for its financial support, only debt related to that utility need be entered. If the applicant is a city, county or special purpose district which relies on general taxing authority for its financial support or is a nonprofit organization, debt related to the general obligations of the city, county, special purpose district, or nonprofit organization should be entered. Include all debt information requested in the table to assure an appropriate review of the sponsor's finances.

Drinking Water Utility Information: Complete this section of the application only if the project includes costs associated with a drinking water project.

Complete the Drinking Water Utility Cash Flow table. Obtain prior year information from previous utility audits. The Current Year column should contain information from the system's current year utility budget. The Future Year column should contain anticipated cash flow information for the utility's first full fiscal year of operation after project completion.

Provide a balance for each restricted account or activity, identify the activity to be completed with the funding, and specify the method used to restrict the funds (*i.e.* governing board resolution, board motion, by-laws, etc.).

Attach the current and proposed rate ordinances or resolutions and rate schedules.

Check whether the sponsor is an incorporated municipality, sanitary district or other system. Municipalities and Sanitary Districts provide rate information based on 5,000 gallons (670 cubic feet) per month. All Other Systems provide rates based on 7,000 gallons (935 cubic feet) per month.

Fill in the current monthly rate being charged to businesses and domestic users to include individual households and farmsteads. If fees are billed quarterly, calculate the monthly rate. Include the proposed new monthly rate. Complete the information for the total number of business and domestic hookups which will be served systemwide. Provide the current average monthly usage by business, domestic, and other customers and specify either gallons or cubic feet. If there is a special rate being charged for users other than business and domestic hookups, provide information about that rate, the number of customers for which the rate applies, and the user's average usage.

Indicate whether fees are calculated on the amount used or on a flat rate.

Furnish dates for when the current rate was adopted, when the proposed fee schedule will take effect, and what the rate was prior to the current rate.

Wastewater Utility Information: Complete this section of the application only if the project includes costs associated with a wastewater project.

Complete the Wastewater Utility Cash Flow table. Obtain prior year information from previous system audits. The Current Year column should contain information from the system's current year utility budget. The Future Year column should contain anticipated cash flow information for the utility's first full fiscal year of operation after project completion.

Provide a balance for each RESTRICTED account or activity, identify the activity to be completed with the funding, and specify the method used to encumber the funds (*i.e.*, board resolution, board motion, by-laws, etc.).

Attach the current and proposed rate ordinances or resolutions and rate schedules.

Check whether the sponsor is an incorporated municipality, sanitary district or other system. Municipalities and Sanitary Districts provide rate information based on 5,000 gallons (670 cubic feet) per month. All Other Systems provide rates based on 7,000 gallons (935 cubic feet) per month.

Fill in the current monthly rate being charged to businesses and domestic users to include individual households and farmsteads. If fees are billed quarterly, calculate the monthly rate. Include the proposed new monthly rate. Complete the information for the total number of business and domestic hookups which will be served systemwide. Provide the current average monthly usage by business, domestic, and other customers and specify either gallons or cubic feet. If there is a special rate being charged for users other than business and domestic hookups, provide information about that rate, the number of customers for which the rate applies, and the user's average usage.

Indicate whether fees are calculated on the amount used or on a flat rate.

Furnish dates for when the current rate was adopted, when the proposed fee schedule will take effect, and what the rate was prior to the current rate.

Storm Sewer Projects: Complete this section of the application only if the project includes costs associated with a storm water project.

Indicate if the sponsor has a separate storm water fee. If so, attach a copy of the existing or proposed rate ordinance or resolution and a brief explanation of how the storm water fee is calculated and collected.

4.9.7 Program Narrative Statement

The following should be used to structure the narrative. Program narrative statements should be typed on a separate sheet of paper and submitted with the application. This statement will be used to rate the project's impact and readiness to proceed.

- A) Project Description – Provide a detailed narrative describing the selected project alternative. Be specific, providing the feet or miles of pipe to be constructed, replaced or repaired; treatment process being utilized; capacity of storage tanks; cubic yards of sediment removal; feet of shoreline stabilization; and so forth. Identify the preferred method of construction or project completion, an itemized break-out of estimated costs, the area to be affected by the project, maps showing locations of services and extent of construction, anticipated operation and maintenance (O&M) cost changes resulting from the project, anticipated rate effects caused by any proposed borrowing or changes to O&M expenses.
- B) Eligibility – Identify the type of entity applying for assistance. If the entity is a nonprofit, provide the date of incorporation and a copy of the bylaws or governing rules that make the entity responsible for the anticipated project. Provide rate information to demonstrate that the existing rate or proposed rate will meet the minimum rate requirements of the program. If the rates will not meet the required minimums, provide a letter requesting

a waiver from the minimum rate requirement and justification for the waiver.

- C) Need/Problem Identification – Provide the required background information to identify the need for the project. If the project is a rehabilitation project, identify when the existing facilities were installed or constructed and explain the past maintenance practices used by the sponsor to maximize the useful life these facilities. If the project is an expansion project, explain the need for the new service and describe existing conditions and facilities. Also provide information that will assure existing collection, distribution, storage, pumping, and treatment facilities will be able to address the additional flow or demand.
- D) Project Design – Provide the engineering design considerations used to develop the cost estimates. Include design criteria used to size the facilities, projected use of the new system to include potential oversizing of lines for future development, effect of new or expansion facilities on the existing infrastructure, and anticipated useful life of existing and anticipated facilities.
- E) Required Permits - Identify the status of required permits (i.e., if secured or applied for). Potential required permits may include: Surface Water Quality Permits, New Drinking Water Capacity Certification, Storm Water Permits, County Conditional Use Permits, County of Municipality Construction Permits, etc.
- F) Acquisition of necessary lands (purchase or option secured) – Identify the extent to which the easements for the project have been secured. Provide a list or number of landowners that must provide easements before the project may proceed. If landowners have not yet provided easements, identify the status of obtaining the easements and how and when the landowners will be contacted and the final easements obtained. If fee title to land is required to complete the project, provide an update on the status of securing the additional land.
- G) Project Schedule – Provide a schedule for the project to include dates for the anticipated completion of the financing package if additional funding is needed to complete the project, design completion (must include time for DENR review and approval), obtaining required permits and authorizations, bid approval, initial construction, final completion, and final project closeout.
- H) Future Projects – Identify any projects that have been identified by the sponsor that affect the sponsor's ability to finance this project. Provide general information about the scope, timing, and estimated cost of anticipated future projects.

4.9.8 Engineering Design and Cost Estimate

Water Infrastructure Projects: A preliminary engineering report with cost estimates was submitted with the State Water Plan application. The outline to be followed for the preliminary engineering report can be found in section 2.7.2.1 of the State Water Plan Application section of this document. Any significant changes to the preliminary engineering analysis, updated cost estimates, and other relevant additional information should be submitted with the funding application.

Watershed Projects: A watershed assessment report and preliminary cost estimate was submitted with the State Water Plan application. A detailed Project Implementation Plan (PIP) in the EPA approved format should be submitted with the funding application. The outline to be followed for the PIP can be found in section 2.7.2.2 of the State Water Plan Application section of this document. Any significant changes to the PIP, updated cost estimates, and other relevant additional information should be submitted with the funding application.

5.0 CLEAN WATER STATE REVOLVING FUND PROGRAM

The Clean Water State Revolving Fund (SRF) Program was established to provide low interest loans to governmental entities for clean water and nonpoint source pollution control projects. The funds available are dependent upon appropriations from the U.S. Congress and repayments from funds previously loaned.

5.1 Eligibility Requirements

Applicants must be a governmental entity with the authority to generate revenues and to repay general obligation, revenue obligation or sales tax obligation bonds. **Project must be on the State Water Plan prior to receiving funding approval.**

5.2 Application Deadlines

Applications must be postmarked or received on or before the **fifteenth** day of January, April, July, or October. Only complete applications will be considered. Applications determined incomplete by the deadlines outlined below will need to be resubmitted for a subsequent funding round.

5.3 Application Requirements

The following items are required to be submitted with the completed application form:

- 1) The application form to include the Certification of Needs Categories; EPA Preaward Compliance Review Report; and Certification Regarding Debarment, Suspension, and Other Responsibility Matters;
- 2) Most recent audit or financial statements to include specific accounting of the fund pledged for repayment of the loan;
- 3) Amortization schedules for debt pledged to same source as this loan
- 4) Current year's budget;
- 5) User charge ordinance or resolution and its effective date;
- 6) Any legal opinions concerning the project;
- 7) Authorized signatory resolution for submittal of application and signing of payment requests;
- 8) A facilities plan; and

- 9) Cultural Resources Effects Assessment Summary for SRF Projects form with supporting documentation, including archaeological surveys if required.

5.3.1 Complete Application Criteria

Within 15 days after the application deadline, the applicant will be notified if the application is complete or incomplete. If incomplete, the applicant has 20 days to submit the information needed to complete the application. Additional time to complete a facilities plan is allowed.

If the facilities plan submitted with the application is determined to be incomplete or insufficient, a complete facilities plan must be postmarked or delivered by March 1st for applications due on January 15th, by June 1st for applications due on April 15th, by September 1st for applications due on July 15th, and by December 1st for applications due on October 15th. The facilities plan is not considered complete until all of the following items are received:

- 1) Information addressing deficiencies identified in the completeness letter;
- 2) Receipt of evidence of advertisement of a public hearing;
- 3) Minutes from the public hearing;
- 4) Comments from the U.S. Fish and Wildlife Service; South Dakota Department of Game, Fish and Parks; Natural Resources Conservation Service; U.S. Army Corps of Engineers; and the State Historical Preservation Office; and
- 5) Resolution of any issues identified during the public hearing or comments from the agencies listed above.

5.3.2 Facilities Planning Process

A facilities plan must be prepared and submitted as part of the Clean Water SRF application. The facilities plan describes the need for the project based on present conditions and future needs, evaluates the costs and adequacies of alternatives, identifies potential environmental impacts; and provides justification for the selected alternative. Section 5.12.1 provides the minimum requirements for a facilities plan.

The facilities plan is the basis for preparing the required environmental review. The public and several review agencies are involved in the preparation of the environmental review. Because the process is time-consuming, it is important to initiate the process prior to submitting the application.

The agencies identified in section 5.12.2 must be given the opportunity to review and comment on the project.

Solicitations for comments regarding cultural resources effects must now be submitted to the Department of Environment and Natural Resources where a determination will be made as to the effect the project may have on cultural resources. This determination of effect will be forwarded to the State Historical Preservation Office, which will then have 30 days to provide comments. This change in procedure was necessitated by recent policy changes within the State Historical Preservation Office.

To assure timely completion of the reviews, adequate information must be submitted for a determination of effect to be made. The Cultural Resources Effects Assessment Summary in Section 5.12.3 may be used for this purpose.

The facilities planning process requires a **public hearing**. A “Notice of Public Hearing” should be published at least 10 days prior to the hearing. The notice shall include a description of the project, the amount of SRF funds to be borrowed, and the interest rate and term of the loan. Section 5.11 contains an example of a Public Hearing Notice. Minutes must be kept at the public hearing and should include a summary of all comments received. A copy of the affidavit of publication and meeting minutes must be submitted as part of the final Facilities Plan.

After a complete facility plan is received, the department will issue an environmental review to the applicant to publish in a local newspaper. **The Board of Water and Natural Resources will consider a loan application only after publication of the environmental review.**

5.3.3 Bond Counsel

Bond counsel must be retained prior to the application being submitted to the department. Bond counsel prepares the loan documents as well as the necessary resolutions and ordinances including the resolution for the board to approve the loan. An opinion shall be issued by bond counsel on the applicant's ability to issue the Clean Water SRF debt.

5.4 Interest Rates and Terms

The rates and terms established by the board are available on the DENR website.

5.5 Award Dates

The department will notify applicants of the date of the board meeting at which applications will be considered. Board meeting dates are public noticed and available on the DENR website.

5.6 Award Criteria

Clean Water SRF applications are reviewed based on the following criteria:

- 1) The availability of funds in the Clean Water SRF program;
- 2) The applicant's need;
- 3) Violation of health and safety standards; and
- 4) The applicant's ability to repay.

5.7 Rules and Regulations

Rules and regulations concerning the Clean Water State Revolving Fund Program may be found in the Administrative Rules of South Dakota 74:05:08 and the federal Clean Water Act. For copies of these rules or the Act, you may contact:

PMB 2020
Department of Environment and Natural Resources
Division of Financial and Technical Assistance

5.8.1 Repayment Information

Interest rate and term you are applying for: _____%, _____years.

What security is being pledged toward the repayment of this loan?

- _____ 1. General Obligation bond (requires bond election)
- _____ 2. Wastewater Revenue bond
- _____ 3. Storm Sewer Revenue bond
- _____ 4. Project Surcharge Revenue bond
- _____ 5. Sales Tax Revenue bond

5.8.2 Documents To Be Submitted With Application

Financial Documents

1. Most recent audit or unaudited financial statement to include specific accounting of fund pledged for repayment.
2. Current year's budget.

Planning and Legal Documents

1. Governing user charge ordinance or resolution and its effective date.
2. Any legal opinions concerning the project.
3. Resolution of authorized signatory for submittal of Clean Water SRF application and signing of payment requests. This resolution should also include the loan amount requested, interest rate and term being applied for, description of proposed project, and security pledged towards repayment of the loan.

Facilities Plan (See Section 5.12 for a detailed outline.)

5.8.3 General Information

5.8.7 Facilities Plan Checklist

Before submitting the application, please take a few moments to complete the following checklist. Addressing these items prior to submitting the application will help expedite the review process.

CHECKLIST OF SRF FACILITIES PLAN REQUIREMENTS

Have the following items been addressed?

- ◆ Submittal of a draft Facilities Plan to the department that addresses those items found in section 5.12.1. _____
- ◆ A public hearing held discussing the project and the use of an SRF loan to finance the project. _____
- ◆ Minutes of the public hearing prepared and submitted to the engineer for inclusion into the final Facilities Plan. _____
- ◆ The affidavit of publication of the public hearing received and submitted to the engineer for inclusion into the final Facilities Plan. (See section 5.11.) _____
- ◆ The five review agencies contacted and responses received for inclusion into the final Facilities Plan. (See section 5.12.2.) _____

5.8.8 Certification of Point Source Needs Categories

Identify the loan amount associated with the needs categories described below. If the loan addresses needs in more than one category, please break down the total amount into estimated amounts for each category.

Category	Definition	Proposed Loan Amount
I	<u>Secondary Treatment and Best Practicable Wastewater Treatment Technology.</u> Costs for facilities to achieve secondary levels of treatment, regardless of the actual treatment levels required at the facility site. Incremental costs for treatment levels above secondary are to be reported in Category II. For purposes of the Survey, "best practicable wastewater treatment technology" and secondary treatment are considered synonymous. Identified alternative conveyance systems (e.g., small diameter gravity, pressure and vacuum sewers) are to be included in Category I.	
II	<u>Advanced Treatment.</u> Incremental costs above secondary treatment for facilities which require advanced levels of treatment. This requirement generally exists where water quality standards require removal of such pollutants as phosphorus, ammonia, nitrates, or organic and other substances. In addition, this requirement exists where removal requirements for conventional pollutants exceed 85 percent.	
III A	<u>Infiltration/Inflow Correction.</u> Costs for correction of sewer system infiltration/inflow (I/I) problems. Costs should also be reported for the preparation of preliminary I/I analysis or for a detailed sewer system evaluation survey.	
III B	<u>Major Sewer System Rehabilitation.</u> Replacement and/or major rehabilitation of existing sewer systems. Costs are reported if the corrective actions are necessary to the total integrity of the system. Major rehabilitation is considered to be extensive repair of existing sewer beyond the scope of normal maintenance programs (i.e., where sewers are collapsing or structurally unsound).	

IV A	<u>New Collectors and Appurtenances.</u> Costs of construction of new collector sewer systems and appurtenances designed to correct violations caused by raw discharges or seepage to waters from septic tanks, or to comply with Federal, State or local actions.	
IV B	<u>New Interceptors and Appurtenances.</u> Costs for new interceptor sewers and pumping stations necessary for the bulk transmission of clean water.	
V	<u>Correction of Combined Sewer Overflows.</u> Costs for facilities, including conveyance, storage, and treatment, necessary to prevent and/or control periodic bypassing of untreated wastes from combined sewers to achieve water quality objectives and which are eligible for Federal funding. It does not include treatment and/or control of storm waters in separate storm and drainage systems.	
VI	<u>New Construction or Rehabilitation of Storm Sewer Systems and Appurtenances.</u> Cost of new construction or rehabilitation associated with the bulk transmission or detention of storm sewer flows. This category includes only runoff projects in communities with Phase I or Phase II storm water permits.	
	TOTAL	

Name of Applicant

Authorized Representative

Date

5.8.9 Certification of Nonpoint Source Needs Categories

Identify the loan amount associated with the needs categories described below. If the loan addresses needs in more than one category, please break down the total amount into estimated amounts for each category.

Category	Definition	Loan Amount
VII-A	<u>NPS pollution - agricultural activities.</u> Plowing, pesticide spraying, irrigation, fertilizing, planting, and harvesting. Example BMPs include conservation tillage, nutrient management, and irrigation water management.	
VII-B	<u>NPS pollution - animal production.</u> Confined animal facilities and grazing. Example BMPs include animal waste storage, animal waste nutrient management, composting, and planned grazing.	
VII-C	<u>NPS pollution - forestry.</u> Removal of streamside vegetation, road construction and use, timber harvesting, and mechanical preparation for the planting of trees. Example BMPs include preharvest planning, streamside buffers, road management, and revegetation of disturbed areas.	
VII-D	<u>NPS pollution - new or existing development in urban or rural setting.</u> Erosion, sedimentation, and discharge of pollutants (e.g., inadequately treated wastewater, oil grease, road salts, and toxic chemicals) into water resources from construction sites, roads, bridges, parking lots, and buildings. Example BMPs include wet ponds, construction site erosion and sedimentation controls, sand filters, and detention basin retrofit. This category includes only runoff projects in communities without phase I or phase II storm water permits.	
VII-E	<u>NPS pollution - ground water protection.</u> Wellhead and recharge protection areas. Activities attributed to specific causes are included in a later, more specific category.	
VII-F	<u>NPS pollution - boating and marinas.</u> Poorly flushed waterways, boat maintenance activities, discharge of sewage from boats, and physical alteration of shoreline, wetlands, and aquatic habitat during operation or construction of a marina. Example BMPs include pumpout systems and oil containment booms.	

VII-G	<u>NPS pollution - mining and quarrying activities.</u> Example BMPs: detention berms and seeding or revegetation.	
VII-H	<u>NPS pollution - abandoned, idle, and underused industrial sites.</u> All pollution control activities at these sites regardless of activity. Example BMPs include ground water monitoring wells, in situ treatment of contaminated soils and ground water, capping to prevent storm water infiltration, and storage tank activities at brownfields.	
VII-I	<u>NPS pollution - tanks designed to hold chemicals, gasoline, or petroleum products.</u> Tanks may be located either above or below ground. Example BMPs include spill containment, in situ treatment of contaminated soils and ground water, and upgrade, rehabilitation, or removal of petroleum/chemical storage tanks.	
VII-J	<u>NPS pollution - sanitary landfills.</u> Example BMPs include leachate collection or on-site treatment, gas collection and control, and capping and closure.	
VII-K	<u>NPS pollution - channel modification, dams, streambank and shoreline erosion, and wetland or riparian area protection or restoration.</u> Example BMPs include conservation easements, swales or filter strips, shore erosion control, wetland development and restoration, and bank and channel stabilization.	
VII-L	<u>NPS pollution - rehabilitation or replacement of individual or community sewerage disposal system.</u> Construction of collector sewers to transport wastes to a cluster septic tank or other decentralized facilities. Collection sewers and expansion of existing or construction of new centralized treatment facilities that replace individual or community sewerage disposal system are included on Point Source Category table.

5.8.10 Preaward Compliance Review

 <div style="display: inline-block; vertical-align: middle; margin-left: 10px;"> EPA United States Environmental Protection Agency Washington, DC 20460 Preaward Compliance Review Report For All Applicants Requesting Federal Financial Assistance </div>		Form Approved OMB No. 2090-0014 Expires 4-30-99	
Note: Read instructions on reverse side before completing form.			
I. A. Applicant (Name, City, State)		B. Recipient (Name, City, State)	
C. EPA Project No.			
II. Brief description of proposed project, program or activity.			
III. Are any civil rights lawsuits or complaints pending against applicant and/or recipient? If "yes", list those complaints and the disposition of each complaint. <div style="float: right;"> <input type="checkbox"/> Yes <input type="checkbox"/> No </div>			
IV. Have any civil rights compliance reviews of the applicant and/or recipient been conducted by any Federal agency during the two years prior to this application for activities which would receive EPA assistance? If "Yes," list those compliance reviews and status of each review. <div style="float: right;"> <input type="checkbox"/> Yes <input type="checkbox"/> No </div>			
V. Is any other Federal financial assistance being applied for or is any other Federal financial assistance being applied to any portion of this project, program or activity? If "Yes," list the other Federal Agency(s), describe the associated work, and the dollar amount of the assistance. <div style="float: right;"> <input type="checkbox"/> Yes <input type="checkbox"/> No </div>			
VI. If entire community under the applicant's jurisdiction is not served under the existing facilities/services, or will not be served under the proposed plan, give reasons why.			
VII. Population Characteristics		Number of People	
1. A. Population of entire service area			
B. Minority population of entire service area			
2. A. Population currently being served			
B. Minority population currently being served			
3. A. Population to be served by project			
B. Minority population to be served by project			
4. A. Population to remain without service			
B. Minority population to remain without service			
VIII. Will all new facilities or alterations to existing facilities financed by these funds be designed and constructed to be readily accessible to and usable by handicapped persons? If "No," explain how a regulatory exception (40CFR 7.70) applies. <div style="float: right;"> <input type="checkbox"/> Yes <input type="checkbox"/> No </div>			
IX. Give the schedule for future projects, programs or activities (or of future plans), by which service will be provided to all beneficiaries within applicant's jurisdiction. If there is no schedule, explain why.			
X. I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.			
A. Signature of Authorized Official		B. Title of Authorized Official	
		C. Date	
For the U.S. Environmental Protection Agency

5.8.11 Certification Regarding Debarment, Suspension, and Other Responsibility Matters

The prospective participant certifies to the best of its knowledge and belief that it and its principals:

- (a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;
- (b) Have not within a three year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
- (c) Are not presently indicted for or otherwise criminally or civilly charged by a government entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (b) of this certification; and
- (d) Have not within a three year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

I understand that a false statement on this certification may be grounds for rejection of this proposal or termination of the award. In addition, under 18 U.S.C. §1001, a false statement may result in a fine of up to \$10,000 or imprisonment for up to 5 years, or both.

Name & Title of Authorized Representative

Signature of Authorized Representative

Date

____ I am unable to certify to the above statements. Attached is my explanation.

5.9 Application Instructions

5.9.1 Application Form

Applicant. Name and mailing address of the entity sponsoring the project.

Federal Employer Identification No. Federal employer identification number of the entity sponsoring the project.

Subapplicant. Organization on whose behalf the application is being submitted.

Proposed Funding Package. Include the amount and type of funds requested, the amount of local funds being provided, including direct public or private contributions, loans, federal funds, and water development district grants. Enter the total amount on the last line. Enter only the costs associated with activities for which assistance is being requested for multi-year or phased projects.

Project Title/Description. Provide a one line title for the project and a brief narrative describing the project. Be specific, providing the feet or miles of pipe, treatment process being utilized, size of lagoons, capacity of wastewater treatment works, and so forth.

Applicant Certification. An official of the sponsoring entity who has been authorized by resolution of the governing body to submit the application must read and sign the application.

Professional Consultants

Bond Counsel's Firm: Identify the bond counsel firm retained by the sponsor, the attorney's name, and the other contact information requested in case questions arise about the application.

Application Prepared By: Identify the entity, the individual that helped prepare the application, and the other contact information requested in case questions arise about the application.

Consulting Engineering Firm: Identify the engineering firm retained by the sponsor, the engineer's name, and the other contact information requested in case questions arise about the application.

Legal Counsel's Firm: Identify the law firm retained by the sponsor, the attorney's name, and the other contact information requested in case questions arise about the application.

5.9.2 Budget Sheets

Note: Multi-year projects should enter only budget costs associated with activities for which financial assistance is being requested.

Line 1.A - Amount needed for personal services related to loan management and clerical duties.

Line 1.B - Amount needed for travel including vehicle rental.

Line 1.C - All legal fees associated with this project including bond counsel fees.

Line 1.D - Amount needed for other administrative expenses, including an independent financial audit, publishing, meetings, and any other expenses expected for project administration, including planning district contracts.

Line 2 - Amounts directly associated with the acquisition of land, existing structures, and related rights-of-way.

Line 3.A - Fees for engineering bidding and design services.

Line 3.B - Fees for engineering construction inspection and audit of construction and related programs.

Line 3.C - Amounts for other technical services, such as surveys, O&M manual preparation, tests, and borings not included in Line 3.A or 3.B.

Line 4 - Amounts for the actual construction of, addition to, or restoration of a facility. Also include in this category the amounts of project improvements, such as roads, access restrictions, new trenches, landscaping, and run-off control measures.

Line 5 - Amount needed for purchase or rental of equipment required for the project.

Line 6 - Amount of contracts (excluding legal, engineering, and construction) associated with the project, including sampling and laboratory services.

Lines 7 & 8 - Identify amounts for items not specifically mentioned above.

Line 9 - Sum of Lines 1 through 8.

Line 10 - Estimated amount for contingencies. Contingencies may not exceed 10% of the amount on Line 9.

Line 11 - Sum of Lines 9 and 10.

Line 12 - Percentage that column total is of total project costs.

5.9.3 Method of Financing

Indicate the source of the secured/unsecured share of funding. If funds have been secured, indicate the amount in the "secured" column. If funds are unsecured at time of application, indicate the amount of the unsecured funds and the date funds are anticipated to be secured in the "unsecured" column. Include any remarks regarding funding in a separate narrative. Total the secured and unsecured amounts at the bottom of the table.

5.9.4 Funds to be Borrowed

Provide the amount, rate, and term of the funds to be borrowed to help finance the project. Include the amount of the annual debt service (based upon quarterly payments) and security pledged towards loan repayment. For "Other", please explain the source of funds along with the above mentioned items.

5.9.5 Repayment Information

Identify the specific rate and term of the loan for which the sponsor is applying. Specify the security pledged to repay the loan.

5.9.6 Documents To Be Submitted With Application

Applications will not be reviewed by department staff until all documents listed in this section are submitted.

Financial Documents

Provide a copy of the financial audit report for the most recent fiscal year. This report should include all operations of the entity (jurisdiction). If certain funds are reported in separate documents, include all reports concerning fiscal operations of the entity. If different funds are accounted for by different fiscal years, make this notation. **If audit for the most recent year is not available, list reason.**

Provide a copy of the current year's budget and next year's, if approved by the governing board.

Planning and Legal Documents

Provide a copy of the existing or proposed user charge ordinance or resolution currently governing the utility department.

Provide a resolution of authorized signatory for the person or persons signing the loan agreement and payment requests.

Provide the Facilities Plan outlined in section 5.12.

5.9.7 General Information

Provide the month and day the sponsor's fiscal year begins.

Fill in population data. Estimate current year if necessary.

List the top five employers in a 30 mile radius of your service area. Also list the number of employees at the facility and the type of business.

5.9.8 Wastewater Utility Information

The following information will be used to evaluate the applicant's capacity to provide local funds for the project.

Attach the current and proposed rate ordinances or resolutions and rate schedules.

Current Utility Debt - Provide the information requested in the table for each obligation pledged towards repayment. If the applicant intends to issue General Obligation or Sales Tax bonds, debt secured by the applicant's general obligations or Sales Tax revenues needs to be entered. If the applicant intends to issue Wastewater Revenue, Storm Sewer Revenue, or Project Surcharge Revenue bonds, only debt related to that utility needs to be entered. Include all required debt information requested in the table to assure an appropriate review of the applicant's finances. Include amortization schedules for debt pledged to the same source as this loan.

Complete the Wastewater Utility Cash Flow table. Obtain prior year information from previous system audits. The Current Year column should contain information from the system's current year utility budget. The Future Year column should contain anticipated cash flow information for the utility's first full fiscal year of operation after project completion.

Provide a balance for each restricted account or activity, identify the activity to be completed with the funding, and specify the method used to restrict the funds (*i.e.*, governing board resolution, board motion, by-laws, etc.).

Check whether the sponsor is an incorporated municipality, sanitary district or other system. Municipalities and Sanitary Districts provide rate information based on 5,000 gallons (670 cubic feet) per month. All Other Systems provide rates based on 7,000 gallons (935 cubic feet) per month.

Fill in the current monthly rate being charged to businesses and domestic users to include individual households and farmsteads. If fees are billed quarterly, calculate the monthly rate. Include the proposed new monthly rate. Complete the information for the total number of business and domestic hookups which will be served systemwide. Provide the current average monthly usage by business, domestic, and other customers and specify either gallons or cubic feet. If there is a special rate being charged for users other than business and domestic hookups, provide information about that rate, the number of customers for which the rate applies, and the user's average usage.

Indicate whether fees are calculated on the amount used or on a flat rate.

Furnish dates for when the current rate was adopted, when the proposed fee schedule will take effect, and what the rate was prior to the current rate.

List the system's five largest customers, the type of business, and the percent this account represents when compared to total system revenues.

For Storm Sewer Projects Only: Indicate if the applicant has a storm sewer fee. If yes, provide a copy of the storm water fee rate ordinance or resolution and explain how the fee is calculated.

5.9.9 Property Tax Information

Fill out this section only if a general obligation bond is being pledged towards repayment of the loan. The property tax information will be used to evaluate the applicant's ability to repay the loan. The purpose of this section is to evaluate a borrower's tax base and customers in order to assess the condition of the community.

Provide the assessed valuation and full and true valuation for the current and last two years.

Provide the amount levied and collected for the most recent three years for which data is available. Indicate any penalties, interest charged, or late payments.

List the five largest taxpayers within the system's service area and describe the type of property involved and the assessed valuation.

Provide the information requested in the table for each obligation to which the general fund has been pledged towards repayment.

5.9.10 Sales Tax Information

Fill out this section only if sales tax is being pledged towards repayment of the loan. The sales tax information will be used to evaluate the applicant's ability to repay the loan.

Provide the amount of sales tax collections by month for each of the last fifteen months.

Provide the information requested in the table for each obligation to which sales tax has been pledged towards repayment.

5.9.11 Facilities Plan Checklist

The Facilities Plan Checklist is provided for your convenience. Review the checklist to make sure the required steps have been taken to ensure an adequate Facilities Plan has been prepared.

5.9.12 Certification of Point Source Needs Categories

Form is self-explanatory.

5.9.13 Certification of Nonpoint Source Needs Categories

Form is self-explanatory.

5.9.14 EPA Form 4700-4 General Instructions

Recipients of federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes.

Title IV of the Civil Rights Act of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. The Act goes on to explain that the title shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the federal financial assistance is to provide employment).

Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall, on the grounds of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities.

Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified handicapped individual shall solely by reason of handicap be excluded from participation in, be denied the benefit of, or be subjected to discrimination under any program or activity receiving federal financial assistance. Employment discrimination on the basis of handicap is prohibited in all such programs or activities.

The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission.

Title IX of the Education Amendments of 1972 provides that no person on the basis of sex shall be excluded from participation in, be denied the benefit of, or be subjected to discrimination under any education program or activity receiving federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution.

The information on this form is required to enable the U.S. Environmental Protection Agency to determine whether applicants and prospective recipients

are developing projects, programs, and activities on a nondiscriminatory basis as required by the above statutes.

Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission.

If an item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable."

In the event an applicant is uncertain about how to answer certain questions, EPA program officials should be contacted for clarification.

- IA. "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance.
- IB. "Recipient" means any entity, other than the applicant, which will actually receive EPA assistance.
- IC. Self-explanatory.
- II. Self-explanatory.
- III. "Civil rights lawsuits" means any lawsuit or complaint alleging discrimination on the basis of race, color, national origin, sex, age, or handicap pending against the applicant and/or entity which actually benefits from the grant. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed.
- IV. "Civil rights compliance review" means any review assessing the applicant's and/or recipient's compliance with laws prohibiting discrimination on the basis of race, color, national origin, sex, age, or handicap. If any part of the review covered the entity which will actually benefit from the grant, it should be listed.
- V. Self-explanatory.
- VI. The word "community" refers to the area under the applicant's and/or recipient's jurisdiction. The "community" might be a university or laboratory campus, or a community within a large city. If there is a significant disparity between minority and nonminority populations to receive service, not otherwise satisfactorily explained, the regional office may require a map which indicates the minority and non-minority population served by this project, program or activity.
- VII. This information is required so that reviewers may determine if a disparity in the proposed provision of services will exist in the event the application is approved for funding. Give population of recipient's jurisdiction, broken out by categories as specified.

In the event the applicant cannot provide the requested information because the funds will be distributed over a wide demographic area which is yet to be determined, an explanation may be provided on a separate sheet. For example, a State applying for a capitalization grant under the State Revolving Fund program may not know which cities and counties will apply for, and receive, SRF loans.

VIII. Self-explanatory.

IX. "Jurisdiction" means the geographical area over which an applicant has the authority to provide service.

X. Self-explanatory.

"Burden Disclosure Statement" - EPA estimates public reporting burden for the preparation of this form to average 30 minutes per response. This estimate includes the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, S.W. Washington, D.C. 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

5.9.15 Certification Regarding Debarment, Suspension, and Other Responsibility Matters

Under Executive Order 12549, an individual or organization debarred or excluded from participation in federal assistance or benefit programs may not receive any assistance award under a federal program, or a sub-agreement thereunder for \$25,000 or more.

Accordingly, each prospective recipient of an EPA grant, loan, or cooperative agreement and any contract or sub-agreement participant thereunder must certify to or provide an explanation why they cannot. For further details, see 40 CFR §32.510, Participants' responsibilities.

5.10 NOTICE OF PUBLIC HEARING

Public Participation Requirements for SRF Programs

The facilities planning process requires public participation. The applicant must hold a public hearing to discuss the project, the proposed financing and subsequent effects on system users. A “Notice of Public Hearing” must be published in an appropriate legal newspaper at least 10 days prior to the hearing. A copy of the affidavit of publication must be submitted as part of the final Facilities Plan. Other notification methods may be used with prior approval by the department. A sample Notice can be found below.

At minimum, the following items shall be addressed at the public hearing:

- The need for the project;
- All alternatives that were evaluated, including the cost of each;
- A description of the project;
- The proposed financing for the project;
- The amount of SRF loan expected to be borrowed;
- The revenue source pledged for repayment;
- The interest rate and term of the loan; and
- The effect of the proposed financing on user rates.

Minutes must be kept at the public hearing and should include a summary of all comments received on the project. A copy of the minutes must be submitted as part of the final Facilities Plan.

NOTICE OF PUBLIC HEARING for the **WASTEWATER PROJECT**

The {city, town, district} is proposing to {briefly describe project}. The {city, town, district} proposes to borrow up to \$XXX,XXX of Clean Water State Revolving Funds at ____% for ____ years. The purpose of the public hearing is to discuss the project, the proposed financing, and the source of repayment for the loan. The public is invited to attend and comment on the project.

The public hearing will be held at {location} on {date} at {time}

5.11 THE FACILITIES PLAN

5.11.1 Minimum Information Expected in Facilities Plans

The following summarizes the minimum information expected in a facilities plan. The information is provided in two sections. The first section is information required in **all** facilities plans. The second section provides more detail based on the project type.

INFORMATION REQUIRED FOR ALL FACILITIES PLANS

Project Development

- Discussion of existing conditions and need for proposed project;
- Discussion of compliance issues; and
- Map showing project area in relation to the community.

Environmental Considerations

- Narrative discussion of any direct environmental impacts;
- Cultural resources review:
 - Completed Cultural Resources Effects Assessment Summary form;
 - Archaeological survey for any project, or a portion of a project, where construction will occur in an undisturbed area, which includes pasture and tilled crop land;
 - Database search of Historic Register if an archaeological survey was not required or if the report does not identify the presence or absence of historic properties within the project area. The database search is available at www.nr.nps.gov;
- Request for comments to the review agencies and responses from each; and
- Approved mitigation plans for addressing any adverse affects identified by the review agencies.

Alternative Development and Selection

- A narrative discussion of appropriate alternatives to include the no action alternative;
- Unit cost breakdowns and present worth or uniform annual cost evaluations for each feasible alternative;
- Narrative discussion justifying the alternative selected;
- Proposed financing of selected alternative and the impact to user fees;
- Discussion of further activities or requirements needed for project development, *i.e., conditional use permits, soil borings or groundwater investigations, new or revised Surface Water Discharge Permits, Corps of Engineers 404 permit, and land/easement acquisition*; and
- Schedule identifying project milestones.

Public Participation

- Proof of public hearing advertisement (affidavit preferred; newspaper copy acceptable);
- Minutes of the public hearing; and
- Narrative discussion of steps taken to resolve issues identified in the public hearing

INFORMATION REQUIRED BASED ON PROJECT TYPE

Rehabilitation of Existing Wastewater Collection or Storm Water Systems

- A narrative description of the system to include age, present condition, problems occurring within the system, and known infiltration/inflow (I/I);
- A map or maps of the project area that shows the following:
 - Existing and proposed pipe type and size;
 - Any historic properties identified within the project area; and
 - Floodplains if the project involves a lift station;
- Alternatives to consider: no-action, trenchless technology, and open trench construction; and
- If I/I studies have been undertaken, the following items must be included:
 - A detailed explanation of the methods used to determine the locations and extent of I/I; and
 - A summary of the findings to include specific areas discovered to have I/I and the extent of I/I in each area.

New Wastewater Collection Lines or Interceptor or Storm Sewers

- Discussion of the ability of the existing wastewater infrastructure (treatment facilities, lift stations, and downstream mains) to accommodate the new flows;
- A map or maps of the project area that show the following:
 - Proposed project route;
 - Wetlands;
 - Any historic properties identified within the project area; and
 - Floodplains;
- Discussion of the ability of the existing infrastructure to accommodate the new flows;
- Discussion of the indirect and cumulative impacts that will result from the project, with emphasis on wetlands, historic properties, endangered species habitat, and floodplain development within the area of impact, and mitigation efforts to address any identified impacts; and
- Alternatives to consider: no-action.

Wastewater Treatment

- Narrative describing the existing facility and a map of its location;
- Evidence of consultation from the DENR Surface Water Quality program regarding potential stream reclassifications, change in permit conditions, or other items that may result in increased treatment requirements;
- All data, records, and technical information used for the basis of the design;
- Design calculations for each feasible alternative (this may be omitted for extensive mechanical treatment options);
- A map or maps for each alternative that show the following:
 - Wetlands;
 - Any historic properties identified within the project area;
 - Floodplains;
 - Airports;
 - All residences, commercial or business development, and water supplies within one-half mile of proposed lagoon, artificial wetland, or land application systems; and
 - Projects involving effluent irrigation or land application of bio-solids will require additional siting information.
- Supplemental information regarding the construction features and static water levels for each well located within one-fourth mile of proposed lagoon or artificial wetland, or land application systems and information regarding water use for each well located within 1,000 feet of proposed lagoon or artificial wetland, or land application systems;
- Alternatives to consider: no-action, collection rehabilitation where excessive I/I is identified, and various treatment technologies to include total retention and discharging lagoons systems, artificial wetlands, and mechanical treatment, where appropriate.

5.11.2 Review Agencies for State Revolving Fund Projects

The following agencies must be given the opportunity to comment on the project. It is the responsibility of the project sponsor or its consultant to supply these agencies with a brief project description and map of the project area. The final facilities plan must include each agency's response.

United States Department of Interior
Fish and Wildlife Service
420 S. Garfield Avenue
Pierre, SD 57501-5408
Attn: Donald Gober, Field Supervisor

South Dakota Dept. of Game, Fish and Parks
Division of Wildlife
523 E. Capitol Avenue
Pierre, SD 57501-3181
Attn: John Kirk, Interagency Coordinator

United States Department of Agriculture
Natural Resources Conservation Service
200 Fourth Street SW
Huron, SD 57350-2475
Attn: Jerry Schaar

U.S. Army Corps of Engineers, Omaha District
Planning Division
Attention: CENWO-PM-AE
106 South 15th Street
Omaha, NE 68102-1618
Attn: Larry D. Janis

5.11.3 CULTURAL RESOURCES EFFECTS ASSESSMENT SUMMARY

Applicant _____ Project Contact _____
Address _____ Telephone Number _____

Legal Location of Project _____
City _____ County _____ Project No. _____

Project Description _____

For projects that involve new construction on vacant land please include information as to what previously occupied the site and whether that site has any known historic or archaeological significance.

Please describe below or attach information supporting the determination of effect.

A map showing the project location is required. Drawings or photographs may also be helpful.

Please indicate the effect the project will have on cultural resources based on the review performed:

_____ No Historic Properties Affected: There are no historic properties present or the undertaking will not affect any properties eligible for or listed in the National Register of Historic Preservation.

_____ No Adverse Effect: This property is listed in or eligible for the National Register of Historic Places. This project will have no adverse effect upon the historic significance of the property because the proposed undertaking meets the Secretary of the Interior's Standards for the Treatment of Historic Properties.

_____ Adverse Effect: This property is listed in or eligible for eligible for the National Register of Historic Places. This project will have an adverse effect upon the historic significance of the property. (Attach proposed mitigation measures that may minimize the adverse effect.)

Prepared by: _____ Date _____

DETERMINATION OF EFFECTS

I have reviewed the project description and the information provided concerning historical and cultural effects of this project. Based on that review, the Department of Environment and Natural Resources concurs with the applicant's determination of the effects that the construction of this project will have on historical or cultural resources. Additionally, if historical or cultural resources are discovered during project construction, the contractor is required to cease construction and notify the State Historical Preservation Officer.

Approved by: _____ Date _____
SD Department of Environment and Natural Resources

6.0 DRINKING WATER STATE REVOLVING FUND PROGRAM

The Drinking Water State Revolving Fund (SRF) Program was established to provide low interest loans for drinking water projects. The funds available are dependent upon appropriations from the U.S. Congress and repayments from funds previously loaned.

6.1 Eligibility Requirements

Applicants must be a governmental entity with the authority to generate revenues and to repay general obligation, revenue obligation, sales tax obligation, or combination of these bonds; or a nonprofit corporation with the authority to generate revenues and repay a loan.

Projects must be on the State Water Plan prior to receiving funding approval.

6.2 Application Deadlines

Applications must be postmarked or received on or before the **fifteenth** day of January, April, July, or October. Only complete applications will be considered. Applications determined incomplete by the deadlines outlined below will need to be re-submitted for a subsequent funding round.

6.3 Application Requirements

The following items are required to be submitted with the completed application form:

- (1) The application form to include the Certification of Needs Categories; EPA Preaward Compliance Review Report; Certification Regarding Debarment, Suspension, and Other Responsibility Matters; and Capacity Assessment Worksheets for Public Water Systems;
- (2) Most recent audit or financial statements to include specific accounting of the fund pledged for repayment of the loan;
- (3) Current year's budget;
- (4) User charge ordinance or resolution and its effective date;
- (5) Any legal opinions concerning the project;
- (6) Authorized signatory resolution for submittal of application and signing of payment requests;
- (7) A facilities plan; and

- (8) Cultural Resources Effects Assessment Summary for SRF Projects form with supporting documentation including archaeological surveys if required.

6.3.1 Complete Application Criteria

Within 15 days after the application deadline, the applicant will be notified if the application is complete or incomplete. If incomplete, the applicant has 20 days to submit the information needed to complete the application. Additional time to complete a facilities plan is allowed.

If the facilities plan submitted with the application is determined to be incomplete or insufficient, a complete facilities plan must be postmarked or delivered by March 1st for applications due on January 15th, by June 1st for applications due on April 15th, by September 1st for applications due on July 15th, and by December 1st for applications due on October 15th. The facilities plan is not considered complete until all of the following items are received:

- 1) Information addressing deficiencies identified in the completeness letter;
- 2) Receipt of evidence of advertisement of a public hearing;
- 3) Minutes from the public hearing;
- 4) Comments from the U.S. Fish and Wildlife Service; South Dakota Department of Game, Fish and Parks; Natural Resources Conservation Service; U.S. Army Corps of Engineers; and the State Historical Preservation Office; and
- 5) Resolution of any issues identified in the public hearing or comments from the agencies listed above.

6.3.2 Facilities Planning Process

A facilities plan must be prepared and submitted as part of the Drinking Water SRF application. A facilities plan describes the need for the project based on present conditions and future needs, evaluates the costs and adequacies of alternatives, identifies potential environmental impacts, and provides a justification for the selected alternative. Section 6.12.1 provides the minimum requirements for a facilities plan.

The facilities plan is the basis for preparing the required environmental review. The public and several review agencies are involved in the preparation of the environmental review. Because the process is time-consuming, it is important to initiate the process prior to submitting the application.

The agencies identified in section 6.12.2 must be given the opportunity to review and comment on the project.

Solicitations for comments regarding cultural resources effects must now be submitted to the Department of Environment and Natural Resources where a determination will be made as to the effect the project may have on cultural resources. This determination of effect will be forwarded to the State Historical Preservation Office, which will then have 30 days to provide comments. This change in procedure was necessitated by a recent policy change within the State Historical Preservation Office.

To assure timely completion of the reviews, adequate information must be submitted for a determination of effect to be made. The Cultural Resources Effects Assessment Summary in section 6.12.3 may be used for this purpose.

The facilities planning process requires a **public hearing**. A “Notice of Public Hearing” should be published at least 10 days prior to the hearing. The notice shall include a description of the project, the amount of SRF funds to be borrowed, and the interest rate and term of the loan. Section 6.11 contains an example Public Hearing Notice. Minutes must be kept and should include a summary of all comments received. A copy of the affidavit of publication and meeting minutes must be submitted as part of the final Facilities Plan.

After these items are addressed, the department will issue an environmental review to the applicant to publish in a local newspaper. **The Board of Water and Natural Resources will consider a loan application only after publication of the environmental review.**

6.3.3 Capacity Assessments

The Safe Drinking Water Act prohibits loans being approved for water systems that do not have the technical, managerial, or financial capacity to operate the system, unless the project will address the capacity deficiency. Applicants with an existing public water system are required to complete the capacity assessment worksheets included in section 6.10. The completed capacity assessment must be included as part of the application.

Applicants requesting assistance for new public water systems must also complete a capacity assessment worksheet. For more information on the new system assessments, see section 6.10.3.

6.3.4 Bond Counsel for Political Subdivisions

Bond counsel must be retained prior to the application being submitted to the department by political subdivisions. Bond counsel prepares the loan documents, as well as the necessary resolutions and ordinances including the resolution for the board to approve the loan. An opinion shall be issued by bond counsel on the applicant's ability to issue the Drinking Water SRF debt.

6.3.5 Legal Counsel for Nonprofit Entities

Legal counsel must be retained prior to the application being submitted to the department by a nonprofit entity. Legal counsel shall review the loan documents, as well as the necessary resolutions and ordinances including the applicant's resolution approving the loan. An opinion shall be issued by legal counsel on the applicant's ability to issue the Drinking Water SRF debt.

6.4 Interest Rates and Terms

Rates and terms established by the board are available on the DENR website.

6.5 Award Dates

The department will notify applicants of the date for the board meeting at which applications will be considered. Board meeting dates are public noticed and available on the DENR website.

6.6 Award Criteria

Drinking Water SRF applications are reviewed based on the following criteria:

- 1) The availability of funds in the Drinking Water SRF program;
- 2) The applicant's need;
- 3) Violation of health and safety standards; and
- 4) The applicant's ability to repay.

6.7 Rules and Regulations

Rules and regulations concerning the Drinking Water SRF Program may be found in the Administrative Rules of South Dakota 74:05:11 and the federal Safe Drinking Water Act. Copies of these rules or the Act are available at:

6.8.1 Repayment Information

Interest rate and term you are applying for: _____ %, _____ years.

What security is being pledged toward the repayment of this loan?

(Political Subdivisions Only)

- _____ 1. General Obligation bond (requires bond election)
- _____ 2. Water Revenue bond
- _____ 3. Project Surcharge Revenue bond
- _____ 4. Sales Tax Revenue bond

6.8.2 Documents To Be Submitted With The Application

Financial Documents

1. Most recent audit or unaudited financial statement to include specific accounting of pledged funds.
2. Current year's budget.

Planning and Legal Documents

1. Governing user charge ordinance or resolution and its effective date.
2. Any legal opinions concerning the project.
3. Resolution of authorized signatory for submittal of the Drinking Water SRF application and signing of payment requests. This resolution must also include the loan amount requested, interest rate and term being applied for, description of proposed project, and security pledged towards repayment of the loan.

Items 4-6 applies to Nonprofit Entities only

4. By-laws
5. Articles of Incorporation
6. Certificate of Good Standing from Secretary of State
7. Facilities Plan (6.12).

6.8.7. Facilities Plan Checklist.

Before submitting the application, please take a few moments to complete the following checklist. Addressing these items prior to submitting the application will expedite the review process

CHECKLIST OF SRF FACILITIES PLAN REQUIREMENTS	
Have the following items been addressed?	
◆ Submittal of a draft Facilities Plan to the department that addresses those items found in section 6.12.1.	_____
◆ A public hearing held discussing the project and the use of an SRF loan to finance the project.	_____
◆ Minutes of the public hearing prepared and submitted to the engineer for inclusion into the final Facilities Plan.	_____
◆ The affidavit of publication of the public hearing received and submitted to the engineer for inclusion into the final Facilities Plan. (See section 6.11.)	_____
◆ The five review agencies contacted and responses received for inclusion into the final Facilities Plan. (See section 6.12.2.)	_____

6.8.8. Certification of Drinking Water Needs Categories

Identify the loan amount associated with the needs category or categories described below. If the loan addresses needs in more than one category, please break down the total amount into estimated amounts for each category.

Definition	Proposed Loan Amount \$
<u>Transmission/Distribution</u>	
<u>Treatment</u>	
<u>Storage</u>	
<u>Source</u>	
<u>System Purchase</u>	
<u>Restructuring</u>	
<u>Land Acquisition</u>	
<u>1452 (k) Loan Activities</u> 1. To acquire land or a conservation easement for source water protection 2. To implement voluntary, incentive-based source water quality protection measures

6.8.10. Certification Regarding Debarment, Suspension and Other Responsibility Matters

The prospective participant certifies to the best of its knowledge and belief that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a government entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (b) of this certification; and

(d) Have not within a three year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

I understand that a false statement on this certification may be grounds for rejection of this proposal or termination of the award. In addition, under 18 U.S.C. §1001, a false statement may result in a fine of up to \$10,000 or imprisonment for up to 5 years, or both.

Name & Title of Authorized Representative

Signature of Authorized Representative

Date

____ I am unable to certify to the above statements. Attached is my explanation.

6.9 Application Instructions

6.9.1 Application Form

Applicant. Name and mailing address of the entity sponsoring the project.

Federal Employer Identification No. Federal employer identification number of the entity sponsoring the project.

Sub Applicant. Organization on whose behalf the application is being submitted.

Proposed Funding Package. Include the amount and type of funds requested, the amount of local funds being provided, including direct public or private contributions, loans, federal funds, and water development district grants. Enter the total amount on the last line. Multi-year or phased projects should enter only the costs associated with activities for which assistance is being requested.

Project Title/Description. Provide a one line title for the project and a brief narrative describing the project. Be specific, providing the feet or miles of pipe, treatment process being utilized, capacity of the storage tanks, and so forth. Include the current monthly drinking water rate. If the rate is not a flat rate, compute the monthly rate at 5,000 gallons for municipalities or sanitary districts and at 7,000 gallons for all other water systems. Additionally, indicate whether a reserve fund has been established for the drinking water utility.

Certification. An official of the sponsoring entity, who has been authorized by resolution of the governing body to submit the application, must read and sign the application.

Professional Consultants

Application Prepared By: Identify the entity, the individual that helped prepare the application, and the other contact information requested in case questions arise about the application.

Consulting Engineering Firm: Identify the engineering firm retained by the sponsor, the engineer's name, and the other contact information requested in case questions arise about the application.

Legal Counsel's Firm: Identify the law firm retained by the sponsor, the attorney's name, and the other contact information requested in case questions arise about the application.

Bond Counsel's Firm: ***This section is required only if the applicant is a political subdivision.*** Identify the bond counsel firm retained by the sponsor, the attorney's name, and the other contact information requested in case questions arise about the application.

6.9.2 Budget Sheets

Note: Multi-year projects should enter only budget costs associated with activities for which financial assistance is being requested.

Line 1.A - Amount needed for personal services related to loan management and clerical duties.

Line 1.B - Amount needed for travel including vehicle rental.

Line 1.C - All legal fees associated with this project including bond counsel fees.

Line 1.D - Amount needed for other administration expenses, including an independent financial audit, publishing, meetings, and any other expenses expected for project administration, including planning district contracts.

Line 2 - Amounts directly associated with the acquisition of land, existing structures, and related rights-of-way.

Line 3.A - Fees for engineering bidding and design services.

Line 3.B - Fees for engineering construction inspection and audit of construction and related programs.

Line 3.C - Amounts for other technical services, such as surveys, O&M manual preparation, tests, and borings not included in Line 3.A or 3.B.

Line 4 - Amounts for the actual construction of, addition to, or restoration of a facility. Also include in this category the amounts of project improvements, such as roads, access restrictions, new trenches, landscaping, and run-off control measures.

Line 5 - Amount needed for purchase or rent equipment required for the project.

Line 6 - Amount of contracts (excluding legal, engineering, and construction) associated with the project, including sampling and laboratory services.

Lines 7 & 8 – Identify amounts for items not specifically mentioned above.

Line 9 - Sum of Lines 1 through 8.

Line 10 - Estimated amount for contingencies. Contingencies may not exceed 10% of the amount on Line 9.

Line 11 - Sum of Lines 9 and 10.

Line 12 - Percentage that column total is of total project costs.

6.9.3 Method of Financing

Indicate the source of the secured/unsecured share of funding. If funds have been secured, indicate the amount in the "secured" column. If funds are unsecured at time of application, indicate the amount of the unsecured funds and the date funds are anticipated to be secured in the "unsecured" column. Include any remarks regarding funding in a separate narrative. Total the secured and unsecured funding amounts at the bottom of the table.

6.9.4 Funds to be Borrowed

Provide the amount, rate, and term of the funds expected to be borrowed to help finance the proposed project. Also include the amount of the annual debt service (based upon quarterly payments) and security pledged towards loan repayment. For "Other", please explain the source of funds along with the above mentioned items.

6.9.5 Repayment Information

Identify the specific rate and term of the loan for which the sponsor is applying. If the applicant is a political subdivision, specify the security pledged to repay the loan.

6.9.6 Documents To Be Submitted With Application

The application will not be reviewed by department staff until all documents listed in this section are submitted.

Financial Documents

Provide a copy of the financial audit report for the most recent fiscal year. This report should include all operations of the entity (jurisdiction). If certain funds are reported in separate documents, include all reports concerning fiscal operations of the entity. If different funds are accounted for by differing fiscal years, make this notation. If audit for the most recent year is not available, list reason.

Provide a copy of the current year's budget and next year's, if approved by the governing board.

Planning and Legal Documents

Provide a copy of the existing or any proposed user charge ordinance or resolution currently governing the utility department.

Provide a copy of the resolution of authorized signatory for the person or persons signing the loan agreement and payment requests.

If a Nonprofit, submit a copy of the organization's By-laws.

If a Nonprofit, submit a copy of the organization's Articles of Incorporation.

If a Nonprofit, submit a copy of the organization's Certificate of Good Standing.

Submit a completed Facilities Plan as outlined in section 6.12.

Submit the completed Capacity Assessment Worksheets provided in section 6.10.

6.9.7 General Information

Provide the month and day the sponsor's fiscal year begins.

Fill in population data. Estimate current year if necessary.

List the top five employers in a 30 mile radius of your service area. Also list the number of employees at the facility and the type of business.

6.9.8 Drinking Water Utility Information

The following information will be used to evaluate the applicant's capacity to provide local funds for the project.

Attach the current and proposed rate ordinances or resolutions and rate schedules.

Current Utility Debt - Provide the information requested in the table for each obligation pledged towards repayment. If the applicant intends to issue Water Revenue or Project Surcharge Revenue bonds, only debt related to the drinking water utility need be entered. If the applicant is a political subdivision and intends to issue either General Obligation or Sales Tax bonds, only debt secured by the applicant's general obligations or sales tax revenues need be entered. Include all required debt information requested in the table to assure an appropriate review of the applicant's finances.

Complete the Drinking Water Utility Cash Flow table. Obtain prior year information from previous system audits. The Current Year column should contain information from the system's current year utility budget. The Future Year column should contain anticipated cash flow information for the utility's first full fiscal year of operation after project completion.

Provide a balance for each restricted account or activity, identify the activity to be completed with the funding, and specify the method used to restrict the funds (*i.e.* governing board resolution, board motion, by-laws, etc.).

Check whether the sponsor is an incorporated municipality, sanitary district or other system. Municipalities and Sanitary Districts provide rate information based on 5,000 gallons (670 cubic feet) per month. All Other Systems provide rates based on 7,000 gallons (935 cubic feet) per month.

Fill in the current monthly rate being charged to businesses and domestic users to include individual households and farmsteads. If fees are billed quarterly, calculate the monthly rate. Include the proposed new monthly rate. Complete the information for the total number of business and domestic hookups which will be served systemwide. Provide the current average monthly usage by business, domestic, and other customers and specify either gallons or cubic feet. If there is a special rate being charged for users other than business and domestic hookups, provide information about that rate, the number of customers for which the rate applies, and the user's average usage.

Indicate whether fees are calculated on the amount used or on a flat rate.

Furnish dates for when the current rate was adopted, when the proposed fee schedule will take effect, and what the rate was prior to the current rate.

List the system's five largest customers, the type of business, and the percent this account represents when compared to total system revenues.

6.9.9 Property Tax Information

Fill out this section only if a general obligation bond is being pledged towards repayment of the loan. The property tax information will be used to evaluate the applicant's ability to repay the loan. The purpose of this section is to evaluate a borrower's tax base and customers in order to assess the condition of the community.

Provide the assessed valuation and full and true valuation for the current and last two years.

Provide the amount levied and collected for the most recent three years for which data is available. Indicate any penalties, interest charged, or late payments.

List the five largest taxpayers within the system's service area and describe the type of property involved and the assessed valuation.

Provide the information requested in the table for each obligation to which the general fund has been pledged towards repayment.

6.9.10 Sales Tax Information

Fill out this section only if sales tax is being pledged towards repayment of the loan. The sales tax information will be used to evaluate the applicant's ability to repay the loan.

Provide the amount of sales tax collections by month for each of the last fifteen months.

Provide the information requested in the table for each obligation to which sales tax has been pledged towards repayment.

6.9.11 Facilities Plan Checklist

The Facilities Plan Checklist is provided for your convenience. Please review the checklist and make sure that the required steps have been taken to ensure that an adequate Facilities Plan has been prepared.

6.9.12 Certification of Drinking Water Needs Categories

Form is self-explanatory.

6.9.13 EPA Form 4700-4 General Instructions

Recipients of federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes.

Title IV of the Civil Rights Act of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the title shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the federal financial assistance is to provide employment).

Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the grounds of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities.

Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified handicapped individual shall solely by reason of handicap be excluded from participation in, be denied the benefit of or be subjected to discrimination under any program or activity receiving federal financial assistance. Employment discrimination on the basis of handicap is prohibited in all such programs or activities.

The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission.

Title IX of the Education Amendments of 1972 provides that no person on the basis of sex shall be excluded from participation in, be denied the benefit of, or be subjected to discrimination under any education program or activity receiving federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution.

The information on this form is required to enable the U.S. Environmental Protection Agency to determine whether applicants and prospective recipients are developing projects, programs and activities on a nondiscriminatory basis as required by the above statutes.

Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission.

If an item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable."

In the event applicant is uncertain about how to answer certain questions, EPA program officials should be contacted for clarification.

- IA. "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance.
- IB. "Recipient" means any entity, other than the applicant, which will actually receive EPA assistance.
- IC. Self-explanatory.
- II. Self-explanatory.
- III. "Civil rights lawsuits" means any lawsuit or complaint alleging discrimination on the basis of race, color, national origin, sex, age or handicap pending against the applicant and/or entity which actually benefits from the grant. For example, if a city is the named applicant but the grant will actually benefit the Department of Water, civil rights lawsuits involving both the city and the Department of Water should be listed.
- IV. "Civil rights compliance review" means any review assessing the applicant's and/or recipient's compliance with laws prohibiting discrimination on the basis of race, color, national origin, sex, age or handicap. If any part of the review covered the entity which will actually benefit from the grant, it should be listed.
- V. Self-explanatory.
- VI. The word "community" refers to the area under the applicant's and/or recipient's jurisdiction. The "community" might be a university or laboratory campus, or a community within a large city. If there is a significant disparity between minority and non-minority populations to receive service, not otherwise satisfactorily explained, the Regional office may require a map which indicates the minority and non-minority population served by this project, program or activity.
- VII. This information is required so that reviewers may determine if a disparity in the proposed provision of services will exist in the event the application is approved for funding. Give population of recipient's jurisdiction, broken out by categories as specified.

In the event the applicant cannot provide the requested information because the funds will be distributed over a wide demographic area which is yet to be determined, an explanation may be provided on a separate sheet. For example, a State applying for a capitalization grant under the State Revolving Fund program may not know which cities and counties will apply for, and receive, SRF loans.

- VIII. Self-explanatory.

IX. "Jurisdiction" means the geographical area over which applicant has the authority to provide service.

X. Self-explanatory.

"Burden Disclosure Statement" - EPA estimates public reporting burden for the preparation of this form to average 30 minutes per response. This estimate includes the time for reviewing instruction, gathering and maintaining the data needed and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, S.W. Washington, D.C. 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

6.9.14 Certification Regarding Debarment, Suspension, and other Responsibility Matters

Under Executive Order 12549, an individual or organization debarred or excluded from participation in federal assistance or benefit programs may not receive any assistance award under a federal program, or a sub-agreement thereunder for \$25,000 or more.

Accordingly, each prospective recipient of an EPA grant, loan, or cooperative agreement and any contract or sub-agreement participant thereunder must certify to or provide an explanation why they cannot. For further details, see 40 CFR §32.510, Participants' responsibilities.

6.10 Capacity Assessment Worksheets for Public Water Systems

**Department of
Environment and Natural Resources**

Revised January 2007

Introduction

Because you are in the process of applying for a Drinking Water State Revolving Fund (DWSRF) loan, it is necessary for you to complete the following worksheets. The Safe Drinking Water Act requires that a system applying for a DWSRF loan must demonstrate that it has financial, managerial, and technical capacity. What exactly does that mean?

- **Technical capacity** - the physical infrastructure of the water system, including but not limited to the source water adequacy, infrastructure adequacy, and technical knowledge. In other words, does your treatment system work the way it is supposed to? Are you providing the safest and cleanest water possible and required by law to your customers right now, and will you be able to in the future?
- **Managerial capacity** - the management structure of the water system, including but not limited to ownership accountability, staffing and organization, and effective linkages. In simpler terms, do you have a capable and trained staff? Do you have an effective management structure?
- **Financial capacity** - the financial resources of the water system, including but not limited to the revenue sufficiency, credit worthiness, and fiscal controls. Basically, does your system have a budget and enough revenue coming in to cover costs, repairs, and replacements?

If it is determined that your system does NOT have the required capacity, you may still qualify for a DWSRF loan if it is going to be used to ensure that your system will have the necessary capacity. If you have questions while completing the following worksheets, please call our office at **(605) 773-3754**, and we will be happy to help.

After DENR receives these worksheets, we will study them and other information located in our files to make a determination whether or not your public water system has the technical, financial, and managerial capacity to be eligible to apply for a DWSRF loan. A final report will be available upon completion of the analysis.

Applicant: _____
Prepared _____

Phone #: _____
Date: _____

Glossary of Terms

Contaminant: Any physical, chemical, biological, or radiological substance or matter in water;

Disinfectant: Any oxidant, including chlorine, chlorine dioxide, chloramine, and ozone, that is added to water in any part of the treatment or distribution process and that is intended to kill or inactivate pathogenic microorganisms;

Disinfectant contact time: The time in minutes that it takes for water to move from the point of disinfectant application or the previous point of disinfectant residual measurement to a point before or at the point where residual disinfectant concentration is measured;

Filtration: A process for removing particulate matter from the water by passing the water through porous media;

Ground Water: The supply of fresh water found beneath the surface of the ground, usually in aquifers, which is often used for supplying wells and springs;

Ground Water Under the Direct Influence of Surface Water: Any water beneath the surface of the ground with a significant occurrence of insects, macroorganisms, algae, or large-diameter pathogens such as *Giardia lamblia*; or any water with significant and relatively rapid shifts in water quality characteristics such as turbidity, temperature, conductivity, or pH which closely correlate to climatological or surface water conditions;

Maximum Contaminant Level (MCLs): The maximum permissible level of a contaminant in water delivered to any user of a public water system. MCLs are enforceable standards;

mg/L: milligrams per liter - equivalent to parts per million;

µg/L: micrograms per liter - equivalent to parts per billion;

NTU: nephelometric turbidity unit;

psi: pounds per square inch

Surface Water: All water that is open to the atmosphere and subject to surface runoff;

Turbidity: A cloudy condition in water due to suspended silt or organic matter; and

Waiver: A process used by the Department of Environment and Natural Resources that allows a public water system to reduce or eliminate monitoring for a particular chemical.

The Technical Portion of your System

Your Water Supply

Please mark ☒ the appropriate box: *Yes*, *No*, or *Unknown* for each section. Please try to determine the answer to every question. ***If a section or question does not apply to your system, please write NA for not applicable.***

Water Supply and Existing Demands	Yes	No	Unknown
Do you know how much water you pump on an average day? Amount: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you know how much water you pump on a peak day? Amount: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you know the maximum amount of water you can pump from your source? Amount: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is your source capacity higher than your peak day demand? Percentage higher or lower: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Can you meet peak demand without pumping at peak capacity for extended periods? Longest time pumping at peak demand: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Have you been able to provide adequate volumes of water during drought cycles?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Have you had to restrict usage at any time for any reason? Please specify: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your system have an emergency or supplemental water supply? Please specify: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have an Emergency Response Plan that will allow you to meet system demand during a drought or shortage, such as the loss of the largest source? <i>If yes, please attach.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Water Demand	Yes	No	Unknown
Do you know whether your system demands will be growing, declining, or remain stable over the next ten years? Please circle: <i>growing, declining, or stable.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your source have additional water available for appropriation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a water right? Water right permit number(s): _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If you have large commercial, industrial, or irrigation users, do you know their long-term plans and understand their needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Purchased Water	Yes	No	Unknown
If you purchase water from another system or a wholesaler, do you know their long-term plans?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a contract to purchase water? If yes, with whom? _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are you currently staying within your contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are you knowledgeable about other demands being placed on the same water source that you are using?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Alternative Sources	Yes	No	Unknown
Are alternative water sources possibly available to you?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are you knowledgeable of the characteristics and costs of using alternative sources?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Water Source	Yes	No	Unknown
Do you know the depth of your well?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Depth: _____			
Do you know the geologic name of the aquifer system from which your water is drawn?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If yes, geologic name: _____			
Are all abandoned water sources properly managed and disconnected to prevent accidental contamination or problems with current water system facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Treatment - Microbiological Contamination

Is your system using surface water or ground water under the influence of surface water? ☐ yes ☐ no

(if you checked “no”, skip to the next section - Ground Water Systems – unless your water system requires treatment other than just disinfection).

Surface Water Systems

Filtration Plant Condition	Yes	No	Unknown
Is your filter plant in good physical condition (free from spalling concrete, peeling paint)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If constructed more than 20 years ago, have treatment processes been upgraded to meet current standards?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are repair parts available?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have redundancy (back-ups/automatic switch-overs) for all major mechanical units?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If no, list units you do NOT have redundancy for: _____			
Can your plant achieve a filtered water turbidity of 0.3 NTU?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have on-line continuous turbidimeters on each filter?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Have you adopted a turbidity goal lower than the standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If yes, list goal: _____			
Do you have the capability to add coagulant before the filter?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Ground Water Systems

Ground Water Under the Influence of Surface Water	Yes	No	Unknown
Is your water free from variations in turbidity and temperature after storm events?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Well Construction and Protection			

Do you know when your well was constructed?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
List year: _____			
Is your well(s) constructed according to current South Dakota regulations?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a source water protection plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is your wellhead finished with a pitless adapter that will prevent contamination from surface water?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Disinfection

Do you disinfect? ☐ yes ☐ no (if “no”, skip to the Infrastructure - Pumping section)

Disinfection	Yes	No	Unknown
Do you regularly inspect and maintain your disinfection / chlorination equipment? Type of Equipment: _____ How often? _____ Disinfectant used: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have back-up equipment? Type: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have adequate contact time following disinfection and before the first user in the distribution system (30 minutes for ground water systems)? Contact time: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Can you detect a chlorine residual at taps at the ends of the distribution system? Free Chlorine Residual: _____ Total Chlorine Residual: _____ (if using chloramines)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Disinfection By-Products

Treatment for the Control of Disinfection By-Products	Yes	No	Unknown
If you treat surface water, are you already practicing or could you adopt “enhanced coagulation” in your current plant?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If you treat surface water, could you still meet current contact-time requirements if disinfection were not allowed before sedimentation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Treatment - Security

Treatment Security	Yes	No	Unknown
Has the system implemented procedures to improve security of its facilities? (i.e. limiting access to sensitive sites, protecting computer and control equipment etc.)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are chemicals used for treatment properly stored and secure?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the water system track chemical usage? (i.e. a sudden	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

increase in usage may signal potential contamination or tampering.

Infrastructure - Pumping

Condition of Pumping Equipment	Yes	No	Unknown
Do you routinely inspect for signs of pump or pump motor problems? How often: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Once diagnosed, are problems corrected in a timely enough manner to avoid crisis financing, costly repairs, and unscheduled downtime?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you hire a qualified pump contractor to perform an inspection of all pumping equipment, identify potential problems, and perform maintenance, on an annual basis?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Standby/Emergency Power Equipment	Yes	No	Unknown
Is there sufficient standby/emergency power capacity to supply 100% of the average daily demand of the system (excluding fire demand)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are any existing standby/emergency power equipment, controls and switches tested or exercised routinely under load conditions, for at least 30 minutes at a time?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Has the local electric utility been made aware of the standby/emergency power provisions made by the water system, so that they can reinforce and safeguard the electrical facilities serving the water operations?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Infrastructure - Storage

Storage Capacity	Yes	No	Unknown
Does the system have sufficient gravity-flow (non-pumped) or emergency generator-supported pumping capability to ensure adequate distribution storage to provide safe and adequate service for up to 24 hours without power? If no, how long: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is there reserve capacity in the tank for fire protection support? Amount: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Security Measures	Yes	No	Unknown
Are any openings, such as vent pipes, screened to protect against the entrance of small animals, birds, and small insects?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are access hatches locked?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is the tank and the immediate surrounding area fenced?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Control Systems			
Is there a high and low water level signal system to control the pumps?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Is there a drain valve or hydrant to allow for draining of the tank?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Tank Maintenance			
Is the tank inspected at least every three years by a qualified tank contractor for evidence of corrosion or pitting, leakage, and structural weakness?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is the tank contractor capable of analyzing the coating of paint on the interior and exterior surfaces of the tank to determine if it contains lead or other hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Infrastructure - Distribution

System Maintenance	Yes	No	Unknown
Do you have an accurate map of your distribution system that indicates main sizes and valve locations?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the operator routinely flush, test, and maintain the hydrants in the system?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
How often: _____			
Are the locations of valves in the mains and curb stops on the service lines precisely known?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the system keep a log of distribution system breaks to identify weak areas in the system?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are histories, locations, size, and type of mains and service lines detailed on records in a secure area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are all valves exercised and lubricated periodically?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is the system free of severe “water hammer” problems?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are meter pits, pressure regulating valves, altitude valves, blow-offs, and other appurtenances maintained on a regular basis?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Unaccounted-for Water	Yes	No	Unknown
Is unaccounted-for water in the water system monitored and analyzed each month?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is the unaccounted-for water less than 15 percent of the total water delivered to the mains?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
List percentage of unaccounted-for water: _____%			
	Yes	No	Unknown
Are the normal operating pressures in the distribution system between 25 psi and 125 psi?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Normal operating pressure: _____ psi			
Do you have a routine leak detection and repair program?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are all sources of supply and customers metered?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the meters calibrated and tested routinely to ensure their accuracy and reliability?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Water Quality in Distribution System	Yes	No	Unknown
Does your system have an active cross-connection control program?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Are any inspections for cross-connections performed?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is there a program for installing and testing backflow prevention devices where potential contamination is present?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is there a program to eliminate "dead-ends" in the mains, where feasible?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Construction Standards	Yes	No	Unknown
Are the majority of your mains 6 inches in diameter or larger?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
List percentage: _____			
Is there a program to gradually replace sub-standard sized mains?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are there suitable rights-of-way and easements provided to the water system for expansion, maintenance, and replacement of mains and services?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is there sufficient earth cover (six feet) to protect the mains from frost damage or heavy loads, if driven over?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are materials of mains designed and selected to resist corrosion, electrolysis, and deterioration?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Distribution System Problems	Yes	No	Unknown
Do you receive any complaints regarding water quality (taste, odor, color, etc.)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
List number of complaints/year: _____			
Most common complaint: _____			
Can you maintain adequate pressure in the distribution system under all conditions of flow?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The Management Portion of your System

Please mark ☐ the appropriate box: *Yes*, *No*, or *Unknown* for each section. Please try to determine the answer to every question. ***If a section does not apply to your system, please write NA for not applicable.***

Operation & Maintenance

Operations Staff	Yes	No	Unknown
Does the person operating your system have current water treatment plant and water distribution operator certification credentials from DENR? <i>If yes, list classification(s):</i> _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your operator receive additional training on an ongoing basis to keep current on new developments in the field?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Future Operational Demands	Yes	No	Unknown
Does your water system obtain any regular or occasional technical assistance from outside sources, such as DENR, your engineer, other utilities or organizations specifically dedicated to providing technical assistance? <i>If yes, who:</i> _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Management & Administration

Who's in Charge?	Yes	No	Unknown
Is there a clear plan of organization and control among the people responsible for management and operation of the system?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your system have written personnel policies and job descriptions signed by the employees?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are the limits of the operator's authority clearly known?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does everyone involved in operations know who is responsible for each area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is someone responsible for scheduling work?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Security	Yes	No	Unknown
Does the system have procedures for handling new and terminated employees (i.e. collecting keys, changing locks and computer passwords)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Rules and Standards	Yes	No	Unknown
Do you have explicit rules and standards for system modifications?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have rules governing new hook-ups?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a water main extension policy?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have standard construction specifications to be followed?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	Yes	No	Unknown
Do you have measures to assure cross-connection control and backflow prevention?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have policies or rules describing customer rights and responsibilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Regulatory Compliance Program	Yes	No	Unknown
Do you fully understand monitoring requirements and have a scheduling mechanism to assure compliance?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you know how to obtain clarification or explanation of requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a mechanism to obtain the most recent information on regulatory requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you maintain adequate records to document compliance? <i>If yes, for how long?</i> _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did your system have any violations of the primary drinking water standards in the last year?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did your system have any monitoring or reporting violations in the last year?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you know what to do in the event of a violation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Emergencies	Yes	No	Unknown
Do you have an Emergency Response Plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is there a contingency for making emergency interconnections to neighboring systems, and do you know they will work if needed?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does everyone involved in operations know what they are to do in the event of contamination from a toxic hazardous waste spill in your source water or a main break or a tank failure?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a clear chain-of-command protocol for emergency action?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is someone responsible for emergency operations, for communications with state regulators, for customer relations, for media relations? <i>If yes, who (title):</i> _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Safety	Yes	No	Unknown
Do you have a safety program defining measures to be taken if someone is injured?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Has the entire staff been properly trained in the location and use of safety equipment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does everyone understand the risks and safety measures involved in handling water treatment chemicals?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have written operating procedures for both routine and emergency system operations?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are you fully aware of Occupational Safety and Health Administration (OSHA) confined space (such as trenches/manholes) regulations?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the system work with customers to promote their awareness of security?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the system have a communication plan to alert customers of a natural or intentional threat to public health?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Maintenance	Yes	No	Unknown
Do you have a planned maintenance management system -- a system for scheduling routine preventive maintenance (line flushing, pumps, meters, storage tanks, etc.)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a system for assuring adequate inventory of essential spare parts and back-up equipment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have relationships with contractors and equipment vendors to assure prompt priority service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have records and data management systems for system operating and maintenance data, for regulatory compliance data, and for system management and administration?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Management Capability	Yes	No	Unknown
Are you getting the outside services and technical assistance you need? Do you have adequate legal counsel, insurance, engineering advice, technical/operations assistance, rate case preparation, and financial advice?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The Financial Portion of your System

Please mark ☒ the appropriate box: *Yes*, *No*, or *Unknown* for each section. Please try to determine the answer to every question. ***If a section does not apply to your system, please write NA for not applicable.***

Financial Planning Mechanisms	Yes	No	Unknown
Does your system develop and follow an annual budget that is approved by the governing body?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the governing body review a monthly summary of revenues and expenses of the utility system?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have within the annual budget separate reserve accounts for equipment replacement, capital improvement, depreciation or security upgrades? <i>If so, list accounts:</i> _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the system have reserve funds available in the event of an emergency?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a capital budget or capital improvement plan that projects future capital investment needs some distance (at least five years) into the future?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a process for scheduling and committing to capital projects?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your planning process take account of all the potential capital needs suggested by your answers to the technical questions in these worksheets?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your long-term planning incorporate analysis of alternative strategies that might offer cost saving to customers, such as consolidation with other nearby systems or sharing of operations and management expenses with other nearby systems?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Rates/Billing - Are they Adequate?	Yes	No	Unknown
Do you regularly review your rates? <i>How often?</i> _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a plan in place for periodic increases in rates?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is the rate structure based on metered watered use? <i>List rates per 1000 gallons:</i> _____ (i.e. \$22 minimum plus \$2.50/1000 gallons)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the rate per 1000 gallons change as consumption increases? <i>If so, please describe:</i> _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does the rate structure assure proportionality among users?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have procedures for billing and collection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is your billing collection rate greater than 95%?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you have collection procedures specifically for delinquent accounts?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Financial Planning Mechanisms - Are they Adequate?	Yes	No	Unknown
Does your system have audited financial statements prepared by a certified public accountant (CPA)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your water system income exceed operating expenses (including debt service)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your water utility support other enterprise funds or the general fund?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Does your system require revenues from other enterprise funds or the general fund for normal operations?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you employ standardized accounting and tracking systems?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you track budget performance?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Do you keep records to substantiate depreciation of fixed assets and accounting for reserve funds?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are financial management recordkeeping systems organized?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are controls exercised over expenditures?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are controls exercised to keep from exceeding your budget?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are there purchasing procedures?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Did your system's governing body review this assessment before returning it to the South Dakota Department of Environment and Natural Resources?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

6.10.1 Financial Spreadsheet

Complete the financial spreadsheet on the following page using the guidance presented on the reverse side of the form.

GUIDELINES:

This cash flow projection form provides a systematic method of estimating cash receipts, disbursements and balances. The entries listed on the form will not necessarily apply to every PWS, and some entries may not be included which would be pertinent to each PWS. It is suggested, therefore, that the form be adapted to each particular PWS, with appropriate changes in the entries as may be required.

Procedure: Most of the entries on the form are self-explanatory; however, the following suggestions are offered to simplify the procedure:

- (1) First gather the audited financial statements, internally prepared statements or budgets and other information for the current year and the two prior years. Include the most recent audited financial statement with your self-assessment report.
- (2) Complete the columns for the prior two years using actual data from your audited financial statements, if available, or your internally prepared financial statements. Keep in mind, for purposes of this analysis, it is important to use **cash** receipts and disbursements. **Suggestion: Round amounts to the nearest dollar.**
- (3) Complete the current year's column using the most recent budget information. Include all expenditures incurred by the utility.
- (4) Complete the form using the suggestions in the partial form below for each entry. Be sure to include any expenditures resulting from planned plant improvement and estimate the impact of inflation on all expenditures.
- (5) Item #1 (Beginning Cash on Hand) plus Item #3 (Total Cash Receipts) minus Item #6 (Total Cash Paid Out) should equal Item #7 (Ending Cash Position).
- (6) Item #13 (Total Added to Reserves) plus Item #14 (Operating Cash) should equal Item #7 (Ending Cash Position).
- (7) Item #1 (Beginning Cash on Hand) should equal Item #14 (Ending Cash Position) from the prior financial period.
- (8) Items #8 & 9 are used together to determine the impact of the rate structure on the equivalent residential user. If industrial or business customers contribute a significant portion of the revenues, these amounts should be looked at separately. Consideration should be given to design a rate structure so that each

category of user pays its proportional share of the costs of operating and maintaining the PWS.

- (9) Item #10 is used to determine to what extent a PWS's net operating income is able to cover its debt service requirements.
- (10) Item #11 is used to determine to what extent a PWS's rate structure produces revenues sufficient to cover operating expenses.
- (11) Item #14 is the operating cash balance at year end. The operating cash balance at the end of any financial period should be adequate to meet the cash requirements for a minimum of one month. If there is too little cash, additional cash may have to be injected or expenditures may have to be reduced. If there is excessive cash on hand, the money should be invested or otherwise deposited into interest bearing accounts (e.g., set up reserves for replacement or capital improvements, etc.)

6.10.2. Financial Spreadsheet

Applicant: _____
Completed by: _____
Date: _____

4 Year Projections	Last Year Actual	Current Year Budget Year 1 Projected	Year 2 Projected	Year 3 Projected	Year 4 Projected
8. Number of Customer Accounts					
9. Avg Annual User Charge Account (2d/8)					
10. Coverage Ratio (2h-5s)/(5t+5u)					
11. Operating Ratio (2d/5s)					
12. Additions to Reserve Funds for the Year:					
a. Debt Service Reserve					
b. Bond Retirement Reserve					
c. Capital Improvement Reserve					
d. Replacement Reserve					
e. Other					
13. Total Reserves (12a through 12e)					
14. Year End Operating Cash (7 – 13)					

4 Year Projections	Last Year Actual	Current Year Budget	Year 2 Projected	Year 3 Projected	Year 4 Projected
1. Beginning Cash on Hand	For the prior period and the current year budget, use the actual cash balance. For all other years, cash on hand should equal item #14 from previous period.				
2. Cash Receipts:					
a. Unmetered Water Revenue	All cash received/estimated for water supplied to residential, commercial, industrial and public customers where the customer charge is not based on quantity, i.e., its based on diameter of service pipe, room, foot of frontage or other type units.				
b. Metered Water Revenue	all cash received/estimated for water supplied to residential, commercial, industrial and public customers where the charge is based on quantity of water delivered.				
c. Other Water Revenue	Other cash received/estimated from sale of water, e.g., sales for irrigation, sales for resale, inter- municipal sales, advalorem taxes (OM&R portion) etc.				
d. Total Water Revenues (2a through 2c)	Self-explanatory				
e. Connection Fees	All cash received/estimated for connection of customer service during the year.				
f. Interest and Dividend Income	All cash received/estimated on interest income from securities, loans, notes, etc., whether the securities are carried as investments or included in sinking or reserve accounts.				
g. Other Income	Other revenues collected/estimated during the period (e.g., disconnection or change in service fees, Profit on materials billed to customers, servicing of customer lines, late payment fees, rents, sales of assets, advalorem taxes (infrastructure portion) etc.).				
h. Total Cash Revenues (2d through 2g)	Self-explanatory				
i. Transfers in/Additional Rev Needed	Includes transfers from other funds w/i the municipality or can be used as a "plug" figure when determining the additional cash needed to cover cash needs.				
j. Loans, Grants or other Cash Injection	Includes loans or grants from financial institutions, inter-municipal loans, state or federal sources.				
3. Total Cash Receipts (2h through 2j)	Self-explanatory				
4. Total Cash Available (1+3)	Self-explanatory				
5. Operating Expenses	Use actual amounts paid when completing the prior year. Estimate the amounts for projected years based on prior year amounts, trends and other known variables (including those related to needs identified in the self-assessment.				
a. Salaries and wages	Cash expenditures made/estimated for salaries, bonuses and other consideration for work related to the O&M of the facility, including administration, and compensation for officers, directors, etc.				
b. Employee Pensions and Benefits	Paid vacations, paid sick leave, health insurance, unemployment insurance, pension plan, etc.				
c. Purchased Water	Amounts paid/estimated for cost of water purchased for resale.				
d. Purchased Power	Amounts paid/estimated for all electrical power for the utility.				
e. Fuel for Power Production	Amounts paid/estimated for fuel purchased for the production of power to operate pumps, etc.				
f. Chemicals	Amounts paid/estimated for chemicals used in the treatment and distribution.				
g. Materials and Supplies	Amounts paid/estimated for materials and supplies used for O&M of the PWS other than those under contractual services.				
h. Contractual Services – Engineering	Amounts paid/estimated to outside engineers to perform ongoing engineering work for the facility.				
i. Contractual Services - Other	Amounts paid/estimated for costs of outside accounting, legal, managerial, and other services.				
j. Rental of Equipment/Real Property	Amounts paid/estimated for costs associated w/the rental of equipment, buildings and real property.				
k. Transportation Expenses	Amounts paid/estimated for automobile, truck, equipment, and other vehicle use and maintenance.				
l. Laboratory	Self-explanatory				
m. Insurance	Amounts paid/estimated for vehicle, liability, workers' compensation and other insurance.				
n. Regulatory Commission Expenses	Amounts paid/estimated for rate cases and other activities with a regulatory commission				
o. Advertising	Amounts paid/estimated for informational, instructional and other advertising.				
p. Miscellaneous	Amounts paid/estimated for all expenses not included elsewhere (e.g. permit fees, training, etc.).				
q. Total Cash O&M Expenses (5a through 5p)	Total of lines 5a through 5p.				
r. Replacement Expenditures	Amounts paid/estimated for replacement of equipment to maintain system integrity.				
s. Total OM&R Expenditures (5q+r)					
t. Loan Principal/Capital Lease Payments	Include cash payments made/estimated for principal on all loans, including vehicle and equipment purchases on time payments and capital lease payments.				
u. Loan Interest Payments	Self-explanatory				

v. Transfers Out	Include cash transfers made/estimated to funds or entities outside the PWS.
w. Capital Purchases (specify):	Amount of cash outlays/estimates for items such as equipment, building, vehicle purchases, and leasehold improvements that were not a part of the initial design of the PWS infrastructure.
6. Total Cash Paid Out (5s through 5x)	Self-explanatory
7. Ending Cash Position (4 – 6)	Self-explanatory
8. Number of Customer Accounts	Use most recent system data or expected increases.
9. Ave User Charge per Customer (2d/8)	Self-explanatory
10. Coverage Ratio (2h-5s)/(5t+5u)	Measure of the sufficiency of net operating profit to cover the debt service requirements of the system. A bond covenant might require this to meet or exceed certain limits (e.g. 1.25)
11. Operating Ratio (2d/5s)	Measure of whether operating revenues are sufficient to cover OM&R expenses. An operating ratio of 1.0 is the bare minimum for a self-supporting facility. With debt service requirements, the operating ratio would have to be higher.
12. Additions to Reserve Funds for the Year:	Do not include depreciation as a reserve unless there is actually a "depreciation" reserve that has cash set-aside for future expansion. Include only amounts that are added to the reserve funds for the year (i.e., do not include accrued interest on CDs).
a. Debt Service Reserve	Funds specifically set-aside to meet debt service requirements or requirements set forth in a loan Covenant/bond indenture.
b. Bond Retirement Reserve	Funds specifically set aside to retire debt as it is scheduled.
c. Capital Improvement Reserve	Funds specifically set aside to meet long-term objectives for major facility expansion, improvement and/or the construction of a new facility.
d. Replacement Reserve	Funds specifically set aside for the future replacement of equipment needed to maintain the integrity of the facility over its useful life.
e. Other	Other cash set-aside for reserve.
13. Total Added to Reserves (12a through 12e)	Total of lines 12a through 12e.
14. Year End Operating Cash (7-13)	All non-reserved cash.

6.10.3 Capacity Requirements for New Drinking Water System

Certificate of Approval: Obtaining a certificate of approval for a new drinking water system is required by law. More importantly, a certificate of approval shows that the drinking water system has gone through the planning process. Planning is critical for all new, as well as existing, water systems. A system that lacks technical, managerial, or financial capacity will have problems complying with all of the requirements of the 1996 Safe Drinking Water Act amendments. Since new water systems are required to complete the planning process, this will help ensure that these systems have adequate capacity and that the public will be provided with safe drinking water.

Who needs a certificate of approval?

All new community and nontransient noncommunity water systems that begin operation after October 1, 1999, are required to obtain a certificate of approval from the Department of Environment and Natural Resources (DENR) before beginning operation.

This includes water systems that do not meet the definition of community or nontransient noncommunity water system (NTNC) at start-up, but are designed to one day meet that definition. For example, a developer plats out 30 lots for homes in the development, but when the water system begins operation, there are only four homes connected to the system. Obviously, the intent is for this water system to one day be large enough to qualify as a public water system; therefore, the developer must meet all the new water system requirements.

Any system that has infrastructure in place before October 1, 1999, and then becomes a new community or NTNC water system only by the addition of new users is not required to obtain a certificate of approval.

What is the process for obtaining a certificate of approval?

DENR recommends that you apply as soon as possible to receive approval of the required documents in a timely manner. Approval may be delayed if more information is needed by the department during the review process. The following are minimum guidelines for certificate approval.

- Submit the New Water System Application and business plan no later than *90 days* before you anticipate beginning operation.
- Submit plans and specifications no later than *30 days* before the anticipated bid-letting and contract award date.
- Submit the operations and maintenance manual as soon as practicable before system start-up

Where do I get more information on obtaining a certificate of approval?

A website has been developed for new water systems. Guidance and applications can be downloaded at:

<http://www.state.sd.us/denr/dw/newsys.htm>.

For more information please contact the Drinking Water Program at (605) 773-3754.

6.11 NOTICE OF PUBLIC HEARING

Public Participation Requirements for SRF Programs

The facilities planning process requires public participation. The applicant must hold a public hearing to discuss the project, the proposed financing and subsequent affects on the system users. A "Notice of Public Hearing" must be published in an appropriate legal newspaper at least 10 days prior to the hearing. A copy of the affidavit of publication must be submitted as part of the final Facilities Plan. Other notification methods may be used with prior approval by the department. A sample Notice can be found below.

At minimum, the following items shall be addressed at the public hearing:

- The need for the project;
- All alternatives that were evaluated, including the cost of each;
- A description of the proposed project;
- The proposed financing for the project;
- The amount of SRF loan expected to be borrowed;
- The revenue source pledged for repayment;
- The interest rate and term of the loan; and
- The affect of the proposed financing on user rates.

Minutes must be kept at the public hearing and should include a summary of the comments received on the proposed project. A copy of the minutes must be submitted as part of the final Facilities Plan.

NOTICE OF PUBLIC HEARING for the **WATER PROJECT**

The {city, town, district} is proposing to {briefly describe project}. The {city, town, district} proposes to borrow up to \$XXX,XXX of Drinking Water State Revolving Funds at ___% for ___ years. The purpose of the public hearing is to discuss the proposed project, the proposed financing, and the source of repayment for the loan. The public is invited to attend and comment on the project.

The public hearing will be held at {location} on {date} at {time}.

6.12 THE FACILITIES PLAN

6.12.1 Minimum Information Expected in Facilities Plans

The following summarizes the minimum information expected in a facilities plan. The information is provided in two sections. The first section is that information required in **all** facilities plans. The second section provides more detail based on the project type.

INFORMATION REQUIRED FOR ALL FACILITIES PLANS

Project Development

- Discussion of existing conditions and need for proposed project;
- Discussion of compliance issues; and
- Map showing project area in relation to the community.

Environmental Considerations

- Narrative discussion of environmental impacts;
- Cultural resources review:
 - Completed Cultural Resources Effects Assessment Summary form;
 - Archaeological survey for any project, or a portion of a project, where construction will occur in an undisturbed area, which includes pasture and tilled crop land; and
 - Database search of Historic Register if an archaeological survey was not required or if the report does not identify the presence or absence of historic properties within the project area. The database search is available at www.nr.nps.gov;
- Request for comments to the review agencies and responses from each; and
- Approved mitigation plans for addressing any adverse affects identified by the review agencies.

Alternative Development and Selection

- A narrative discussion of appropriate alternatives to include the no action alternative;
- Unit cost breakdowns and present worth or uniform annual cost evaluations for each feasible alternative;
- Narrative discussion justifying the alternative selected;
- Proposed financing of selected alternative and the impact to user fees;
- Discussion of further activities or requirements needed for project development, i.e. conditional use permits, soil borings or groundwater investigations, New Drinking Water System Certificate of Approval, Corps of Engineers 404 permits, and land/easement or water rights acquisition and
- Schedule identifying project milestones.

Public Participation

- Proof of public hearing advertisement (affidavit preferred; newspaper copy acceptable);
- Minutes of the public hearing; and
- Narrative discussion of steps taken to resolve issues identified in the public hearing.

INFORMATION REQUIRED BASED ON PROJECT TYPE

Water Distribution Replacement

- A narrative description of the system to include age, present condition, problems occurring within the system; and known water loss.;
- A map or maps of the project area that shows the following:
 - existing and proposed pipe type and size;
 - Any historic properties identified within the project area; and
- Alternatives to consider: no-action, trenchless technology, and open trench construction.

New Water Distribution Lines

- Discussion of the capacity of the existing infrastructure and water supply source to accommodate the new demands;
- A map or maps of the project area that shows the following:
 - Proposed project route;
 - Wetlands;
 - Any historic properties identified within the project area; and
 - Floodplains;
- Discussion of the ability of the existing infrastructure to accommodate the new water demand;
- Discussion of the direct and indirect/cumulative impacts that will result from the project with emphasis on wetlands, historic properties, endangered species habitat, and floodplain development within the area of impact, and mitigation efforts to address any identified impacts; and
- Alternatives to consider: no-action.

Water Treatment

- Narrative describing the existing facility and a map of its location;
- All data, records, and technical information used for the basis of the design;
- Evidence of sufficient water rights to provide water for the design capacity; and
- Alternatives to consider: no-action, appropriate treatment technologies, and regionalization or consolidation of systems, which must include formal

proposals or correspondence from regional water system(s) stating ability and willingness to provide service and details and costs associated with the regional water system's proposal.

Storage

- Narrative describing existing water storage facilities;
- Historical water use records for average and peak conditions;
- Projected average and peak water use;
- A map or maps of the project area that shows the following:
 - Location of proposed project;
 - Wetlands;
 - Any historic properties identified within the project area; and
 - Floodplains if the project involves a booster station;
- Alternatives to consider: no-action.

Water Supply

- Narrative identifying existing water source;
- Historical water use records for average and peak conditions;
- Projected average and peak water use;
- Discussion of how any potential contaminant source was taken into consideration during the site selection process, and if appropriate, how the risk posed by those potential contaminant sources to the new water source are to be mitigated (information regarding potential contaminant sources regulated by this department may be obtained from the DENR Ground Water Quality Program's Source Water Coordinator);
- Discussion of the existing treatment facility's capacity to treat additional water;
- Discussion of the compatibility of the new source and the existing treatment system to meet Safe Drinking Water Act requirements;
- A map or maps of the project area that shows the following:
 - Project location;
 - Wetlands;
 - Any historic properties identified within the project area; and
 - Floodplains;
- Evidence of legal right to use and develop the water source; and
- Alternatives to consider: no-action and regionalization or consolidation of systems, which must include formal proposals or correspondence from regional water system(s) stating ability and willingness to provide service and details and costs associated with the regional water system's proposals.

6.12.2 Review Agencies for State Revolving Fund Projects

The following agencies must be given the opportunity to comment on the proposed project. It is the responsibility of the project sponsor or its consultant to supply these agencies with a brief project description and map of the project area. The final facilities plan must include each agency's response.

United States Department of Interior
Fish and Wildlife Service
420 S. Garfield Avenue
Pierre, SD 57501-5408
Attn: Donald Gober, Field Supervisor

South Dakota Dept. of Game, Fish and Parks
Division of Wildlife
523 E. Capitol Avenue
Pierre, SD 57501-3181
Attn: John Kirk, Interagency Coordinator

United States Department of Agriculture
Natural Resources Conservation Service
200 Fourth Street SW
Huron, SD 57350-2475
Attn: Jerry Schaar

U.S. Army Corps of Engineers, Omaha District
Planning Division
Attention: CENWO-PM-AE
106 South 15th Street
Omaha, NE 68102-1618
Attn: Larry D. Janis

6.12.3 CULTURAL RESOURCES EFFECTS ASSESSMENT SUMMARY

Applicant _____ Project Contact _____
Address _____ Telephone Number _____

Legal Location of Project _____
City _____ County _____ Project No. _____

Project Description _____

For projects that involve new construction on vacant land please include information as to what previously occupied the site and whether that site has any known historic or archaeological significance.

Please describe below or attach information supporting the determination of effect.

A map showing the project location is required. Drawings or photographs may also be helpful.

Please indicate the effect the project will have on cultural resources based on the review performed:

_____ No Historic Properties Affected: There are no historic properties present or the undertaking will not affect any properties eligible for or listed in the National Register of Historic Preservation.

_____ No Adverse Effect: This property is listed in or eligible for the National Register of Historic Places. This project will have no adverse effect upon the historic significance of the property because the proposed undertaking meets the Secretary of the Interior's Standards for the Treatment of Historic Properties.

_____ Adverse Effect: This property is listed in or eligible for eligible for the National Register of Historic Places. This project will have an adverse effect upon the historic significance of the property. (Attach proposed mitigation measures that may minimize the adverse effect.)

Prepared by: _____ Date _____

DETERMINATION OF EFFECTS

I have reviewed the project description and the information provided concerning historical and cultural effects of this project. Based on that review, the Department of Environment and Natural Resources concurs with the applicant's determination of the effects that the construction of this project will have on historical or cultural resources. Additionally, if historical or cultural resources are discovered during project construction, the contractor is required to cease construction and notify the State Historical Preservation Officer.

Approved by: _____ Date _____
SD Department of Environment and Natural Resources
